

Is 2582586.ru a scam? TrustSniffer's high-risk assessment: 0/100

2582586.ru

Verdict

0

OUT OF 100

CRITICAL RISK

2582586.ru shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language automotive news portal (Auto World) publishing news, motorsport coverage, industry articles and practical car guides; content appears to be aggregated from open sources and provided for informational purposes.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Auto World

Автомобильный информационный портал.

What 2582586.ru served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2005.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

2582586.ru is a Russian-language automotive information portal branded “Auto World,” presenting automotive news, motorsport coverage, industry reporting, traffic-law material, and practical vehicle guides for an apparently advertising-supported readership.

Scam/Impersonation Risk

Contradictory risk signals are present. External security detections identify the domain as malicious in six evaluations and suspicious in one, including a Fortinet threat detection, and the domain is confirmed as blacklisted by external reputation sources. This is materially inconsistent with the site's otherwise ordinary presentation as an automotive news portal. The homepage itself does not show a login, payment, wallet, or credential-harvesting form; its single detected form is a search function, and page analysis found no direct impersonation or phishing indicators. Those benign content and behavior observations do not resolve the external reputation conflict. The current registration record also conflicts with the site's substantial historical

archive, creating a provenance issue that should be reconciled before the domain is trusted for anything beyond passive viewing.

EVIDENCE

- External reputation telemetry: 6 malicious detections, 1 suspicious detection, and a Fortinet threat detection; confirmed blacklist status is recorded.
- Current registration telemetry: created 2025-12-30; reported age 0.63 years.
- Web archive: 328 snapshots spanning 2005-10-18 to 2026-06-11, covering 22 years with a maximum recorded gap of 1 year.
- Homepage behavior: one search form, no login form, no hidden sensitive form, and no detected wallet or credential-handling activity.

Regulatory Verification Notes

The site presents itself as an informational media portal rather than a financial or broker service, and no license, registration number, or clearly identified legal operator was established in the supplied page content. This is a disclosure and verification gap, not independent proof of fraud; however, the operator identity remains unverified and the available governance information is insufficient for institutional reliance. The current registration record names DOMAINSHOP-RU as registrar, while the hosting and certificate data confirm only technical service arrangements, not the legal identity of the publisher. No broker-dataset match was identified, which provides no regulatory assurance.

EVIDENCE

- Homepage: titled “Auto World — Автомобильный информационный портал” and focused on automotive news, motorsport, industry updates, traffic law, and vehicle maintenance.
- Registration record: registrar DOMAINSHOP-RU; creation date 2025-12-30T14:07:28Z; expiration date 2026-12-30T14:07:28Z.
- Hosting telemetry: served from AS39134, UNITEDNET - EDINAYA SET LIMITED LIABILITY COMPANY, RU.
- Transport security: TLS certificate issued by YR2 with DV validation, valid to 2026-10-08T13:17:54+00:00.

What to Verify Next

Before any organizational reliance, an independent source should confirm the current publisher’s legal name, operating address, and accountable editorial or commercial contact. The archive and current registration records should be reconciled to establish whether the historical domain continuity relates to the present publisher. A current reputation review should also confirm whether the external blacklist status has been remediated or remains active. Sensitive interactions should remain excluded unless those checks produce a clear, independently corroborated basis for trust.

EVIDENCE

- Identity verification: no independent signal supplied that connects the site to a verified real-world operator.
- Provenance review: the current registration record and the long-running archive record require reconciliation.
- External-status review: blacklist and malicious-detection findings remain the decisive unresolved security issue.

Summary Verdict

The overall posture is **critical trust risk**, with sensitive interaction risk unsuitable for account access, credential submission, or financial activity. The site's ordinary editorial presentation and absence of page-level harvesting indicators do not outweigh the confirmed external security contradictions.

Infrastructure Integrity

The site resolves to a single likely origin address without a detected CDN or WAF, so protective edge infrastructure is not providing a meaningful mitigating layer. Direct origin exposure is not itself proof of malicious intent, but it reduces infrastructure-based reassurance in the context of the reputation findings.

Closing Assessment

Prospective users should restrict activity to passive reading and defer login, credential, or financial interaction until the domain's reputation, provenance, and responsible operator have been independently cleared.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence

50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2582586.ru.

- The request stayed on 2582586.ru. It was not redirected to another domain. CLEAR
- Registration is published under DOMAINSHOP-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2026-12-30. NOTED
- The earliest public archive of this site is from 2005-10-18. CLEAR
- It is hosted on UNITEDNET, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2582586.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
