Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal Serbian-language parked-domain page stating that the domain is registered through SuperHosting.RS and will be available soon. It presents no operating service, commercial offering, transaction workflow, or stated business purpose beyond a hosting placeholder.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially outweigh the page's otherwise inert presentation. External security checks recorded multiple malicious detections, a further suspicious detection, and confirmed blacklist status across two external blacklist sources; this is the basis for treating sensitive interaction as unsuitable. The homepage itself does not request credentials, payments, or other sensitive input, and no direct phishing form was observed, but the absence of an active interaction surface does not neutralize the external threat evidence. The domain's historical record shows continuity rather than a confirmed repurposing event, so the principal concern is the external malicious-reputation signal, not a demonstrated change of ownership or business model.

EVIDENCE

- External reputation checks recorded 14 malicious detections and 1 suspicious detection for the domain; one tier-one security vendor also flagged it.
- The domain is confirmed on 2 external blacklist sources.
- Registration records show creation on 2020-08-27, making the domain approximately 5.98 years old.
- Web-archive coverage comprises 8 snapshots from 2021-11-23 through 2026-02-25, spanning 6 years tracked.

Regulatory Verification Notes

The current page supplies no legal entity information, licensing statement, registration number, terms, or operating disclosures that would support regulatory verification. This is a material verification gap if the site later presents financial, commercial, or other regulated services. Registration data lists Superhosting as registrar and associates the registrant with Bar 25th d.o.o.; that association does not independently verify the real-world operator. The transport certificate and hosting records confirm technical deployment, not authorization or legitimacy.

EVIDENCE

- The homepage contains only a “coming soon” message and registrar attribution, with no licensing or legal disclosures.
- Registration data lists Superhosting as registrar and Bar 25th d.o.o as the recorded owner.
- The site is served from AS208898, identified as SUPERHOSTINGRS_AS — Superhosting doo, RS.
- TLS uses issuer YR1 with DV validation and is valid to 2026-11-11.

What to Verify Next

Before any future engagement, an independent registry check should confirm the legal operator and any authorization required for the service eventually offered. Any contact or support route should be validated through an independently sourced channel, and any later request for credentials, downloads, payments, or account access should be assessed only after the site publishes verifiable operating and security information.

EVIDENCE

- The homepage currently contains 0 forms, including no login or sensitive-data form.
- Behavioral inspection recorded 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 wallet-drainer runs.
- The page presents no transaction workflow or commercial service against which authorization can presently be tested.

Summary Verdict

The overall posture is **critical trust risk**. Available evidence does not support treating the website as trustworthy for sensitive interaction, and the real-world operator remains unverified. The limited page content is insufficient to offset the confirmed external reputation contradictions.

Infrastructure Integrity

The site resolves directly to one likely origin IP, with no CDN or WAF detected and no edge-IP layer identified. This provides no meaningful protective infrastructure mitigation against the external reputation concerns.

Closing Assessment

The site should be kept to non-interactive observation unless and until independent operator, authorization, and security checks produce satisfactory results.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 25th.rs at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
