

Is 26588.top a scam? TrustSniffer's high-risk assessment: 0/100

26588.top

Verdict

0

OUT OF 100

CRITICAL RISK

26588.top shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A Chinese-language lottery/gambling site providing Taiwan lottery results, historical draws, betting tips and promoted alternate domain(s) and sponsor ads. The page appears promotional with limited transparency about licensing or payment flows.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://26588.top/

What 26588.top served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Chinese-language lottery and gambling-promotional service presenting Taiwan lottery results, historical draws, betting tips, sponsor advertising, and links to alternate domains. Its apparent business model is referral or affiliate promotion rather than operation of a clearly identified, transparently licensed betting service.

Scam/Impersonation Risk

The site presents several direct risk indicators, including promotion of an alternate domain, prompts to use another browser or domain to continue access, unverified contact or address information, and an opaque path from published betting content to any underlying payment or wagering service. Its claims and promotional presentation are not supported by clear operator evidence. No conflicting legal identities or explicit brand impersonation were observed, but the domain is **blacklisted** by the evaluated external sources, and malicious detections were recorded; this is a material contradiction that outweighs the absence of a login form or wallet-drainer behavior in the captured session. The appropriate posture is to treat the site as unsuitable for credentials, payments, or betting transactions.

EVIDENCE

- The homepage publishes Taiwan lottery results, historical draws, betting recommendations, sponsor material, and an alternate-domain notice directing visitors elsewhere.
- External security evaluation recorded 14 malicious detections and a blacklist status, with Kaspersky and Sophos among the flagged providers.
- Browser observation recorded a maximum post-interaction DOM difference of 6,221 and classified alternate-domain promotion, sponsor content, gambling content, and redirection-oriented behavior as suspicious.
- Archive records show 10 snapshots from 2018-07-05 through 2025-07-18, covering 8 tracked years.

Regulatory Verification Notes

The homepage does not identify a licensing authority or license number for the gambling-related activity, and it does not clearly establish the legal entity responsible for the service. This is a regulatory and transparency gap rather than, by itself, proof of fraud; however, in combination with the confirmed external reputation warnings and the opaque commercial flow, it prevents the site from being treated as a regulated betting operator. Independent identity verification remains unresolved. The site uses a valid domain-validated TLS certificate, but transport encryption confirms only encrypted communication and not licensing or operator legitimacy.

EVIDENCE

- The homepage contains no stated licensing authority or license number for the promoted lottery or betting activity.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-09-30T12:00:12+00:00.
- The domain's registrar is NameSilo, LLC; the available evidence does not independently connect the site to a verified legal operator.

What to Verify Next

Before any engagement, an appropriate gambling regulator's public registry should be checked for the operator name, domain, and any claimed service authorization. The promoted destination and payment beneficiary should be independently validated through regulator records, established corporate records, and payment-provider confirmation rather than through links supplied by the homepage. Official support and contact channels should also be confirmed through an independent, offline route. Pending those checks, sensitive interaction should not proceed.

EVIDENCE

- The homepage's lottery and betting presentation provides a specific basis for checking the relevant gambling-licensing registry.
- The referral-oriented business description provides a specific basis for confirming the legal payee and destination before any financial transfer.
- The unresolved identity status provides a specific basis for independently validating official contact channels.

Summary Verdict

The overall posture is critical, with confirmed external threat and reputation contradictions that make the website unsuitable for sensitive interaction. Its apparent content purpose and business model do not provide sufficient assurance of a legitimate, accountable operator, and legitimacy should not be treated as established.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF infrastructure and resolves through CDN edge servers rather than a directly observable origin. This reduces direct exposure of the hosting environment and is a mitigating technical control, but it does not offset the site's external threat detections or establish trustworthiness.

EVIDENCE

- Served from AS13335 (CLOUDFLARENET—Cloudflare, Inc., US); observed edge IPs were 104.21.28.221, 172.67.147.185, 2606:4700:3036::6815:1cdd, and 2606:4700:3037::ac43:93b9.
- Four CDN edge addresses were observed and zero likely origin addresses were identified.
- The TLS certificate uses DV validation and issuer YE2, with expiry recorded as 2026-09-30T12:00:12+00:00.

Closing Assessment

The site should be handled as a blocked sensitive-interaction candidate: no credentials, payments, betting deposits, or other financially consequential actions should be submitted through it. Any business need should be redirected to independently verified, regulator-recognized channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 26588.top.

- The request stayed on 26588.top. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-06. NOTED
- The earliest public archive of this site is from 2018-07-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 26588.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
