

Is 29go.net a scam? TrustSniffer's high-risk assessment: 0/100

29go.net

Verdict

0

OUT OF 100

CRITICAL RISK

29go.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Very small/empty page showing only the domain text. No links, forms, or business information present; likely a parked or placeholder domain.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	18 years old Registered history	CLEAR
Web archive	Archived since 2010 37 snapshots	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

https://29go.net/

What 29go.net served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

29go.net presents as a minimal parked or placeholder domain rather than an operating business website. The visitor is shown only the domain text, with no visible product, service, transaction flow, contact route, or stated commercial purpose.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a critical-risk site for sensitive interaction.

Multiple external detections identify the domain as malicious or suspicious, and blacklist status is confirmed by more than one source. The homepage itself is effectively empty, providing no legitimate business context to counter those signals; its numeric-prefix presentation was also algorithmically associated with "go.com," although no confirmed brand impersonation or identity inconsistency was established. The absence of active forms or scripts limits observed exploitation behavior during capture, but it does not offset the external threat detections.

EVIDENCE

- The homepage contains only the text “29go.net,” with no links, forms, business information, or transactional functionality.
- External reputation results recorded 14 malicious detections and 1 suspicious detection; the domain was also marked blacklisted by 2 sources.
- Archive records show registration continuity rather than a newly created domain: registered 2008-10-15 (~17.85 years old).
- The web archive recorded 37 snapshots from 2010-12-22 through 2025-10-10, spanning 16 tracked years.

Regulatory Verification Notes

The site does not provide a corporate identity, legal terms, licensing statement, registration number, or other business disclosure from which an operator or regulated status can be independently assessed. This is a material transparency gap for any service involving financial activity, but it is separate from the confirmed external reputation findings. Independent identity verification remains unestablished, and no broker match was identified in the available third-party contextual check.

EVIDENCE

- The homepage provides no company name, address, contact details, legal notice, or licensing disclosure.
- The domain is served through AS32244, identified as LIQUIDWEB — Liquid Web, L.L.C., US.
- The site's TLS certificate is issued by YR2, uses domain validation (DV), and is valid to 2026-10-08.

What to Verify Next

Any proposed financial, credential-based, or account-related interaction should be suspended until the relevant operator identity and licensing position are independently confirmed through the applicable official registry. Contact channels should be validated through an independently sourced route, and any payment or account process should be checked for enforceable entity details and consumer protections before use. The domain should also be re-evaluated by the organization's security controls before being permitted in an enterprise environment.

EVIDENCE

- The homepage contains no official contact route or business details suitable for independent verification.
- No license authority or license number is claimed on the available site content.
- No login form, sensitive form, external submission, or wallet interaction was observed during the captured sessions.

Summary Verdict

The overall posture is **critical risk**, with the site unsuitable for sensitive interaction on the available evidence. Its operator identity and business purpose are not established, while the external reputation contradictions are sufficiently serious to outweigh the limited benign technical behavior observed.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure of the hosting environment, but it is not evidence of legitimacy. The underlying hosting arrangement is associated with Liquid Web, and the infrastructure included observed CDN edge addresses alongside a potential origin candidate.

Closing Assessment

The appropriate enterprise disposition is to block or isolate the domain and prohibit login, credential submission, financial activity, and other sensitive interaction unless a separate security review produces compelling contrary evidence.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 29go.net.

- The request stayed on 29go.net. It was not redirected to another domain. CLEAR

- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by swswebhosting.net, across 2 name servers. NOTED
- The registration is paid up to 2026-10-15. NOTED
- The earliest public archive of this site is from 2010-12-22. CLEAR
- It is hosted on LIQUIDWEB, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 29go.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
