

Is 29w.ru a scam? TrustSniffer's high-risk assessment: 23/100

29w.ru

Verdict

23

OUT OF 100

CRITICAL RISK

29w.ru shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 55%.

What this site appears to be

A Russian-language maintenance/coming-soon notice indicating the site is temporarily offline for servicing. No forms, links, or monetization present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://29w.ru/>

What 29w.ru served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website 29w.ru currently presents a Russian-language maintenance and coming-soon notice stating that servicing is in progress and that the site will reopen later. It is therefore functioning as a static placeholder rather than exposing an identifiable operating business, transaction flow, account area, or monetized service.

Scam/Impersonation Risk

The current page contains no visible login form, payment request, wallet interaction, impersonated brand, or other active phishing mechanism. However, external threat intelligence records a **confirmed blacklist** hit for the domain, including three malicious and one suspicious detection; this is a material contradiction that outweighs the benign appearance of the maintenance page. One abuse report associated with the hosting IP is attributed to shared provider infrastructure and carries zero confidence, so it is not treated as direct evidence against the website itself. No conflicting legal-entity names or confirmed brand impersonation were identified.

EVIDENCE

- The homepage displays only a maintenance notice and contains no forms, links, financial requests, or service flows.
- External reputation assessment recorded 3 malicious detections, 1 suspicious detection, and a confirmed blacklist status for 29w.ru.
- The hosting-IP record contains 1 abuse report, attributed to shared infrastructure with a confidence score of 0; the report concerns the provider IP rather than being specifically attributed to the website.

Regulatory Verification Notes

The available site content does not independently identify an operating legal entity, licensing authority, or registration number. This is a substantive transparency gap because the only accessible page is a maintenance placeholder, and the operator identity remains unverified. The domain itself is long-established, but registration duration does not establish that the current site is operated by a regulated or otherwise accountable business. No matching broker record was identified in the available third-party context; that absence is reputational context, not evidence of licensing or compliance.

EVIDENCE

- The accessible homepage is titled “Техническое обслуживание” and provides no legal, corporate, licensing, or ownership disclosure.
- The domain registration record shows registration on 2015-11-13, with an age of 10.77 years, through SPRINTNAMES-RU.
- The site is served from AS8342, RTComm-AS - JSC RTComm.RU, RU.
- The TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-09-23T19:52:03+00:00.

What to Verify Next

Before any future activation or engagement, an institution should independently establish the operator’s legal name and confirm any claimed authorization directly with the relevant jurisdictional registry. Any later request for credentials, payment, investment, or account access should be evaluated only after the restored site, its legal terms, and its independently verified contact channels have been reviewed. The blacklist status should also be resolved through an independent security review before sensitive interaction is permitted.

EVIDENCE

- The homepage currently provides no operational workflow through which ownership, licensing, payment handling, or account security can be validated.
- The available identity-verification status is unverified, so on-site claims alone would not establish the real-world operator.
- The current page is a maintenance placeholder; any future change in functionality should trigger a fresh assessment of its content and interaction paths.

Summary Verdict

The site has a **critical trust posture** for sensitive interaction. The confirmed blacklist status and malicious detections create a materially elevated risk profile, while the presently benign page reflects only the site’s limited offline state and does not neutralize those external contradictions.

Infrastructure Integrity

The site resolves directly to a single origin address with no detected CDN or WAF layer. This provides limited edge-level mitigation and should be regarded only as an infrastructure observation, not as evidence of legitimacy.

Closing Assessment

Sensitive actions should remain withheld unless the operator, regulatory standing, and security reputation are independently cleared after the site becomes operational.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 195.161.68.210 (Avguro Technologies Ltd. Hosting service provider, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 29w.ru.

- The request stayed on 29w.ru. It was not redirected to another domain. CLEAR
- Registration is published under SPRINTNAMES-RU. CLEAR
- DNS for this domain is served by ru., across 4 name servers. NOTED
- The registration is paid up to 2026-11-13. NOTED
- It is hosted on RTCOMM-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 29w.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
