

Is 2adigital.org safe? TrustSniffer's low-trust assessment: 40/100

2adigital.org

Verdict

40

OUT OF 100

LOW TRUST

2adigital.org is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 60%.

What this site appears to be

Marketing agency homepage for 2.A DIGITAL describing services (SEO, development, design, marketing, social media, e-commerce), client testimonials, contact info, and headquarters address. Primary call-to-action is to contact or request a quote.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 2adigital.org served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is the public-facing homepage of 2.A DIGITAL, a digital marketing agency presenting SEO, web and app development, design, marketing, social-media management, and e-commerce services. Its apparent business model is client-funded agency work, with visitors directed toward service enquiries and quote requests.

Scam/Impersonation Risk

The site content itself presents a conventional agency model and does not show a login form, credential-harvesting flow, wallet interaction, or other obvious phishing mechanism. However, the domain has a **confirmed blacklist signal**, with multiple external detections identifying malicious or suspicious activity; this is materially inconsistent with treating the site as suitable for sensitive interaction. The homepage also promotes unsupported performance claims, including “The #1 SEO agency,” an “88% Average Conversion Rate,” “47M+ Traffic Generated,” “250 Clients served,” and “150 Growth rate,” without visible substantiation in the supplied content. These claims are not, by themselves, proof of fraud, but they reduce the evidentiary value of the otherwise professional presentation. No identity contradiction or brand impersonation was observed, so the concern is driven by external threat reputation rather than conflicting legal identities. The published contact address

`info@2adigital.org.com` is also a contact-channel integrity anomaly because the domain structure appears capable of causing delivery failure or functioning as a possible typosquat.

EVIDENCE

- External reputation telemetry recorded 3 malicious detections and 1 suspicious detection across 4 evaluated results; the domain was also identified on an external blacklist.
- The homepage contains one contact form and no login form, hidden form, password submission, wallet-connect execution, or clipboard-hijacking behavior.
- Domain registration telemetry records creation on 2020-03-18, with an age of 6.42 years and expiry on 2028-03-18.
- Archive records contain 112 snapshots from 2021-11-23 through 2026-06-08, covering 6 years, with no detected category repurposing or semantic drift.

Regulatory Verification Notes

The reviewed site presents itself as a commercial digital agency rather than a regulated financial or investment service. Its legal and identity disclosure is therefore relevant primarily to contracting and supplier due diligence: the supplied page evidence does not provide a licensing authority or license number, and the on-page disclosure state is unclear. This is a verification gap, not independent evidence of a scam. Identity linkage is assessed as likely rather than independently verified, and the site's professional content, social links, historical continuity, and conventional contact workflow should not be treated as proof of the real-world operator's legal identity. The domain is registered through NameCheap, Inc.; this is an administrative registration fact and does not establish ownership or regulatory standing.

EVIDENCE

- The homepage identifies the business as 2A DIGITAL and describes SEO, development, design, marketing, social media, and e-commerce services.
- The supplied business pages contain no stated licensing authority or license number.
- Domain registration records list NameCheap, Inc. as registrar, with a 2020-03-18 creation date and 2028-03-18 expiration date.
- The site's transport encryption uses a DV certificate issued by YE1, valid through 2026-10-30.

What to Verify Next

Before any contract, payment, file exchange, or access to business systems, the prospective counterparty should independently confirm the agency's registered legal name, physical business presence, directors or principals, client references, and authority to contract. The quoted services, performance metrics, deliverables, ownership of advertising accounts, termination rights, data-processing obligations, and refund terms should be documented in a signed agreement. Any payment should use a method with suitable commercial dispute and chargeback protections, and official contact channels should be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The homepage's primary calls to action are "Contact Us" and "Get a Quote," making supplier and contracting due diligence the relevant next step.
- The site presents client testimonials and performance counters, but the supplied content does not include independent substantiation for those claims.
- The contact workflow is a standard contact form and does not request sensitive credentials in the observed page behavior.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a plausible agency presentation and some indicators of operational continuity, but those positives do not overcome the confirmed external threat-reputation contradictions. Legitimacy remains apparent rather than proven, and the available evidence does not support treating the website as appropriate for sensitive interaction.

Infrastructure Integrity

The supplied technical evidence identifies hosting on Hostinger infrastructure in Ukraine and valid domain-validated TLS issued by YE1. No specific CDN, WAF, or origin-protection posture is established in the available evidence, so infrastructure provides no basis for increasing the trust assessment.

Closing Assessment

Use should remain limited to low-risk review and controlled business due diligence; sensitive credentials, financial commitments, and access to enterprise systems should not be provided unless independent counterparty verification and contractual safeguards are completed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2adigital.org.

- The request stayed on 2adigital.org. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-18. CLEAR
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2adigital.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
