

Is 2alb-atfal.com a scam? TrustSniffer's high-risk assessment: 0/100

2alb-atfal.com

Verdict

0

OUT OF 100

CRITICAL RISK

2alb-atfal.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Arabic-language website for Dr. Waleed Ismail, a pediatric cardiac surgeon in Egypt. Site contains informational articles on congenital heart disease, patient stories, clinic address and phone number. No payment flows or credential-harvesting elements detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 2alb-atfal.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Arabic-language website presents itself as the professional medical site of Dr. Waleed Ismail, a pediatric cardiac surgeon in Egypt. It provides educational material on congenital heart disease and pediatric cardiac surgery, patient stories, clinic information, and a route for consultation or appointments.

Scam/Impersonation Risk

The website's stated medical purpose and its apparently informational presentation do not resolve the more serious external security evidence. The domain is **blacklisted**, and independent security assessments recorded 15 malicious detections and one suspicious detection, including detections from two major security vendors. The supplied page analysis found no brand impersonation, identity inconsistency, payment flow, or credential-harvesting form, but those benign page characteristics are outweighed by the confirmed reputation contradictions. No suspicious contact-email anomaly was identified. The site should therefore be treated as unsuitable for credentials, account access, or financial interaction.

EVIDENCE

- The homepage contains Arabic medical content concerning pediatric cardiac surgery, congenital heart disease, patient care, and patient stories.
- The domain was registered on 2022-12-25 and is approximately 3.65 years old.
- Web archives contain 51 snapshots from 2023-03-04 through 2026-06-06, covering 4 tracked years.

Regulatory Verification Notes

The available material identifies a named medical professional and includes a Privacy Policy and contact route, but the supplied content does not state a licensing authority, professional registration number, or independently verifiable corporate entity. The operator's real-world identity remains unverified, and ownership opacity limits the strength of the on-site identity claims; this is an identity-verification limitation rather than a separate finding of impersonation. A non-matching third-party broker record provides no additional basis for treating the site as a regulated financial or investment entity. The domain was registered through HOSTINGER operations, UAB. Transport encryption is present, but the certificate is domain-validated only and does not independently establish the operator's medical credentials or legal status.

EVIDENCE

- The supplied legal and identity material includes a Privacy Policy but no stated licensing authority or registration number.
- The domain registrar is HOSTINGER operations, UAB.
- The TLS certificate was issued by YE2 with DV validation and is valid to 2026-09-19.

What to Verify Next

Before any appointment commitment, disclosure of medical records, payment, or other sensitive exchange, independently confirm the practitioner's professional registration and clinic affiliation through the relevant Egyptian medical or institutional registry. Confirm the clinic's address and telephone details through an independently sourced hospital, professional directory, or offline channel rather than relying solely on the website. Security teams should also block or isolate the domain pending review of the blacklist and malicious-detection findings.

EVIDENCE

- The supplied identity-verification status is unverified, so professional credentials and institutional affiliation require independent confirmation.
- The site's stated purpose involves medical consultation, making independent validation of the practitioner and clinic the relevant due-diligence control.
- The external security evidence includes a confirmed blacklist status and multiple malicious detections requiring security review before sensitive interaction.

Summary Verdict

The overall posture is **critical**, with a confirmed sensitive-interaction risk. The site may present a coherent professional narrative, but the available evidence does not support treating it as trustworthy for credentials,

personal medical information, payments, or other consequential actions.

Infrastructure Integrity

The site is hosted by AS-HOSTINGER—Hostinger International Limited, CY, on AS47583, with no CDN detected and four likely origin-IP candidates resolving in Ukraine. This hosting arrangement offers no demonstrated protective CDN/WAF layer that could materially offset the external reputation findings.

EVIDENCE

- Hosted on AS47583 (AS-HOSTINGER—Hostinger International Limited, CY); resolved infrastructure country: UA.
- Infrastructure resolution identified 4 unique IPs, 0 edge IPs, and 4 likely origin IPs; no CDN was detected.

Closing Assessment

Activity should remain limited to passive viewing until the practitioner, clinic, and domain reputation have been independently validated; credentials, sensitive records, and financial transactions should not be submitted.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2alb-atfal.com.

- The request stayed on 2alb-atfal.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-12-25. CLEAR
- The earliest public archive of this site is from 2023-03-04. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2alb-atfal.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
