

Is 2bebienesraices.com safe? TrustSniffer's low-trust assessment: 25/100

2bebienesraices.com

Verdict

25

OUT OF 100

LOW TRUST

2bebienesraices.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language real estate agency website listing properties for sale and rent, providing company info, services, team contacts and testimonials. Appears to be a standard brokerage site.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 2bebienesraices.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

A Spanish-language real-estate brokerage website, 2be Bienes Raíces presents properties for sale and rent alongside brokerage services, credit management, advisory, administration, team contacts, and customer testimonials; its apparent business model is to facilitate property transactions and related services.

Scam/Impersonation Risk

The site's presentation is internally consistent with a conventional real-estate agency: the homepage contains property listings, service descriptions, team information, and a contact form, and it displays the promotional counter "1,300+ Available Properties." No brand impersonation or conflicting legal identity was identified in the supplied page analysis. However, this otherwise ordinary presentation is outweighed by a confirmed blacklist status supported by two external sources, including eight malicious and one suspicious detection. That convergence creates a material risk that the domain may be unsafe for sensitive interaction, regardless of its benign-looking real-estate content. The available historical record does not show suspicious repurposing, but it is limited and should not be treated as strong provenance evidence.

EVIDENCE

- Homepage: Spanish-language property listings for sale and rent, service descriptions, team contacts, testimonials, and the “1,300+ Available Properties” counter.
- External reputation telemetry: 8 malicious detections, 1 suspicious detection, and confirmed blacklist status from 2 sources.
- Domain and archive telemetry: registered 2020-02-19; approximately 6.5 years old; 3 archive snapshots spanning 2021–2025, covering 5 tracked years.

Regulatory Verification Notes

The available site content identifies an apparent real-estate brokerage and describes services including credit management, advisory, and property administration. The operator’s real-world identity is not independently verified by the supplied evidence. No licensing claim or license number was identified in the available site content, which is a regulatory-transparency gap requiring confirmation through the relevant jurisdiction’s real-estate registry. The absence of a matching broker record in the supplied third-party dataset is contextual only and is not a licensing determination. Transport security and ordinary hosting stability are positive technical properties, but they do not establish legal authorization or resolve the external reputation contradiction.

EVIDENCE

- About, services, and contact content: identifies the apparent brokerage activity, related services, team contacts, and customer-facing contact capability.
- Hosting telemetry: served from AS46606, Unified Layer, US.
- TLS telemetry: Certera RSA DV SSL CA 2, DV validation, valid through 2027-01-26.

What to Verify Next

Before any transaction or sensitive interaction, the claimed business name, responsible agents, property mandates, and payment recipient should be independently matched to authoritative real-estate and corporate records. Any licensing or registration requirement applicable to the operating jurisdiction should be checked directly with the relevant regulator, rather than relying on site content. Property ownership, listing authorization, commission terms, refund conditions, and escrow or deposit arrangements should be confirmed through independently sourced records and offline contact channels. Account access, credential submission, and financial transfers should remain suspended unless those checks resolve the reputation concern.

EVIDENCE

- Property listing pages: identify individual sale and rental offerings that require independent confirmation of ownership or listing authority.
- Services and terms-related content: describes brokerage and advisory activity that may create contractual, commission, or payment obligations.
- Contact page: provides the site’s published communication route for comparison against independently obtained business records.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears to offer a conventional brokerage service, but the confirmed external reputation contradiction is sufficiently material that the apparent legitimacy of its presentation cannot support normal high-impact engagement.

Infrastructure Integrity

The domain resolves directly to a single likely origin address on Unified Layer, with no CDN or edge-IP layer detected. The hosting arrangement is technically identifiable and does not indicate an elaborate concealment mechanism, but it offers no meaningful basis for offsetting the confirmed reputation concern.

Closing Assessment

Prospective users should limit activity to passive review and independent due diligence; login, credential submission, and financial transactions should not proceed unless the domain and operating business are validated through authoritative, independently sourced channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2bebienesraices.com.

- The request stayed on 2bebienesraices.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by site5.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2bebienesraices.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
