- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Russian-language cryptocurrency and mining news publication offering dated reporting, analysis, educational resources, and a mining calculator, with an advertising-supported editorial business model rather than a deposit-taking or investment-return proposition.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive solicitation, or confirmed malicious reputation signals were observed. The homepage presents named authors and dated coverage of cryptocurrency markets, mining, regulation, exchanges, and blockchain security. Its only detected form is a site-search function; there is no login form, sensitive-data collection, wallet connection, or concealed form behavior. The domain's long operating history and continuous archival record materially support provenance and are consistent with the current publishing identity.

- The homepage attributes current articles to named authors and provides publication dates alongside substantive news content.
- The homepage contains one search form, with no sensitive fields, hidden forms, password submission, wallet interaction, or untrusted form destination detected.
- External reputation checks recorded 0 malicious and 0 suspicious classifications, no malicious safe-browsing finding, and no abuse reports for the hosting address.
- Domain and archive telemetry: registered 2017-08-18 (~8.96 years old); 296 archive snapshots spanning 2017-09-30 to 2026-07-15 (10 years tracked), with no suspicious repurposing or semantic drift established.

Regulatory Verification Notes

The site operates as a news and education publisher, not as a broker, exchange, custodian, or investment platform on the assessed homepage. It does not request deposits, promise returns, or claim financial-services authorization; consequently, the absence of an on-page licence claim is not inherently anomalous for the presented business model. The homepage links to editorial policies, legal notices, advertising information, and contact pages, supporting an identifiable publishing operation, although the supplied page evidence does not establish the contents of any corporate registration disclosure. No matching broker record was found in the supplied third-party broker context, but that result is neither a licensing determination nor an adverse reputational verdict.

- The homepage describes and delivers cryptocurrency news, analysis, educational material, and a mining calculator without presenting an investment account or deposit workflow.

- Navigation on the homepage exposes editorial-policy, legal-notice, advertising, and contact sections.
- The domain is registered through REGRU-RU and remains registered through 2027-08-18.
- Hosting and transport telemetry: served from AS200350 (YandexCloud – Yandex.Cloud LLC, RU); TLS certificate issued by YE1 (DV), valid to 2026-09-17.

What to Verify Next

Institutional onboarding should confirm the publisher’s legal identity and advertising terms from the linked legal and commercial pages, then retain the relevant disclosures for vendor records. Any editorial claim capable of influencing a financial decision should be checked against primary market, issuer, or regulatory sources, reflecting the inherent subject-matter risk of cryptocurrency reporting rather than a concern about the site's legitimacy. Official contact channels may also be confirmed independently before entering into advertising or commercial arrangements.

- The homepage provides dedicated legal, editorial, advertising, and contact navigation suitable for documentary review.
- The homepage covers market prices, monetary-policy developments, exchange activity, security incidents, and digital-asset regulation, all of which may involve time-sensitive factual claims.
- The publication’s visible commercial model is advertising and audience engagement, making advertising terms and publisher identity the relevant onboarding documents.
- The site has an established traffic footprint within the global top one million, ranked 284,667.

Summary Verdict

The website is a legitimate, established, and trustworthy cryptocurrency news publication. Its coherent editorial presentation, durable provenance, clean reputation, and benign interaction behavior converge on a high-confidence legitimacy assessment with no observed contradictory risk signals.

Infrastructure Integrity

The site is directly hosted by Yandex Cloud in Russia and resolves to a single likely origin address without a detected CDN or WAF layer. This is a conventional, clearly attributable hosting posture; direct origin exposure provides less network-layer shielding than an edge-protected deployment, but the supplied evidence shows no associated abuse pattern or infrastructure-integrity concern.

Closing Assessment

Normal browsing, account login if offered through standard site functionality, and routine use are appropriate; commercial counterparties should complete ordinary publisher-onboarding checks before entering contractual or advertising relationships.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2bitcoins.ru.

- The request stayed on 2bitcoins.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-08-18. NOTED
- The earliest public archive of this site is from 2017-09-30. CLEAR
- It is hosted on YandexCloud, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2bitcoins.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
