

Is 2bittechnology.in a scam? TrustSniffer's high-risk assessment: 0/100

2bittechnology.in

Verdict

0

OUT OF 100

CRITICAL RISK

2bittechnology.in shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

This is a parked domain landing page hosted via Hostinger. It contains promotional CTAs for hosting, website builders, VPS and business email and provides no service-specific content or user login functionality.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://2bittechnology.in/>

Registered at  **HOSTINGER**

If this is your domain, you can manage it in your Hostinger account.

What 2bittechnology.in served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a parked-domain landing page presenting Hostinger promotional calls to action for web hosting, AI-assisted website building, VPS hosting, domain search, and business email; its apparent purpose is referral-style monetization rather than delivery of a distinct service or account-based platform.

Scam/Impersonation Risk

The site presents no service-specific scam mechanics, login workflow, wallet connection, or sensitive submission form, and no brand impersonation or conflicting legal identity was identified. However, external security intelligence records four malicious detections and one suspicious detection, together with a confirmed blacklist listing. Those signals create a material contradiction to the otherwise limited and relatively benign appearance of the parked page. Abuse reports associated with the hosting address are expressly attributed to shared provider infrastructure, so they do not by themselves prove that this domain generated the reported activity; the confirmed blacklist and malicious detections nevertheless support a clearly cautionary posture. The

current registration record also conflicts with historical archive activity, which warrants provenance scrutiny rather than being treated as proof of malicious repurposing.

EVIDENCE

- External security checks recorded 4 malicious detections and 1 suspicious detection for the domain; a Fortinet detection was included among the flagged results.
- The domain was recorded as registered on 2026-01-15 and approximately 0.59 years old in the current registration record.
- Web archives contain 12 snapshots spanning 2015–2025, covering 11 tracked years; this historical activity predates the current registration record and requires independent explanation.
- The hosting address 2.57.91.91 carries 28 abuse reports, attributed to shared infrastructure operated by Hostinger International Limited.

Regulatory Verification Notes

The homepage is a Hostinger parking template rather than an operating business site. It does not identify a service operator or legal entity, and it does not claim a license, registration number, or regulatory authority. That is a significant transparency gap for any party considering a commercial, financial, or otherwise sensitive relationship, although the page itself does not present a regulated financial product. Identity verification remains unconfirmed; the registration record names HOSTINGER operations, UAB as registrar, not necessarily the operator of the parked domain. The absence of a broker match in the available third-party dataset provides no positive regulatory conclusion.

EVIDENCE

- The homepage is titled “Parked Domain” and states that the domain is on the Hostinger DNS system.
- The current registration record lists HOSTINGER operations, UAB as registrar and gives a creation date of 2026-01-15.
- The site’s hosting infrastructure is served from AS47583, AS-HOSTINGER – Hostinger International Limited, CY.
- Transport encryption uses a DV certificate issued by YE1, valid until 2026-09-28.

What to Verify Next

Before any sensitive interaction, an independent security team should determine why the domain appears on blacklist and malicious-detection records and whether those records relate to the present parked content or prior activity. Domain control and the responsible operator should be confirmed through an independent registrar or offline business channel. Any proposed commercial engagement should also be conditioned on independently confirming the relevant legal entity, applicable authorization, and official support channels.

EVIDENCE

- The homepage contains no login form, hidden sensitive form, password submission, or wallet-connection activity.
- Observed browser behavior included 10 external XHR requests and 8 external POST requests across 2 successful runs, with a maximum external-activity ratio of 93.1%.
- The browser recorded 6 console errors and a maximum post-interaction DOM difference of 35.
- No wallet-provider, wallet-sensitive, or wallet-drainer activity was detected.

Summary Verdict

The website has a critical trust posture for sensitive interaction. Its parked-page presentation is not sufficient to offset the convergence of confirmed blacklist status, malicious external detections, unresolved operator identity, and provenance inconsistency. Account access, credential submission, financial activity, and other sensitive use cases are not supported by the available evidence.

Infrastructure Integrity

The site resolves through Hostinger infrastructure in Cyprus, with no CDN edge identified and one likely origin address exposed. The hosting arrangement provides no substantive legitimacy assurance; the provider-level abuse reporting is associated with shared infrastructure, while the absence of an additional protective edge layer leaves the site's direct hosting posture comparatively straightforward to observe.

Closing Assessment

The appropriate operational treatment is read-only observation only; sensitive interaction should remain blocked unless independent security, ownership, and business-verification checks produce a documented resolution.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 35% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2bittechnology.in.

- The request stayed on 2bittechnology.in. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-15. NOTED
- The earliest public archive of this site is from 2015-06-16. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2bittechnology.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
