

Is 2casas.com a scam? TrustSniffer's high-risk assessment: 0/100

2casas.com

Verdict

0

OUT OF 100

CRITICAL RISK

2casas.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

The page is a parked domain notice: 'Site Offline / Site No Longer Exists' with a contact phone number for purchasing the domain. No other content or functionality present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	9 flagged it VirusTotal	RISK

Site No Longer Exists

What 2casas.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

2casas.com currently presents a parked-domain notice stating that the site is offline or no longer exists and that the domain is available for purchase. It offers no operating service, account functionality, or substantive business information; its apparent purpose is domain-sale brokerage rather than an active commercial or financial platform.

Scam/Impersonation Risk

The site has **confirmed external reputation contradictions**: nine malicious and one suspicious detections were recorded, and blacklist status was reported by two external sources. These signals are materially more significant than the homepage's benign presentation. The page itself contains no login form, payment workflow, sensitive form, wallet connection, or active service, so the observed content does not demonstrate an active phishing mechanism; however, the current parked state does not resolve the external threat findings. No identity inconsistency or brand-impersonation evidence was observed. The domain's historical record also shows

substantial changes in observed content over time, which limits confidence that historical presence represents the current operator or use.

EVIDENCE

- Homepage: “Site Offline / Site No Longer Exists,” with a domain-purchase contact and no operating service.
- External reputation assessment: 9 malicious detections, 1 suspicious detection, and blacklist confirmation from 2 sources.
- Archive record: 32 snapshots spanning 2004–2025, covering 22 tracked years; the current registration record identifies creation in 2021 with an age of approximately 5.6 years.

Regulatory Verification Notes

The website provides no active legal, corporate, licensing, or regulated-business disclosure because it is presently a domain-for-sale page. This is a transparency gap for any party considering the domain, but it is not by itself evidence of a scam. No broker-reputation match was identified in the available third-party context; that absence does not establish licensing, ownership, or legitimacy. The current registration record names GoDaddy.com, LLC as registrar and shows the registration continuing through 2027, while the historical archive indicates earlier activity under the domain; this supports provenance context but does not independently verify the present counterparty.

EVIDENCE

- Registration record: created 2021-01-12 and approximately 5.6 years old; registrar is GoDaddy.com, LLC; expiration is 2027-01-12.
- Homepage: no company name, registered-entity information, license, registration number, terms, privacy notice, or regulated-service disclosure.
- Site transport encryption: TLS issued by YR1, domain validation (DV), valid to 2026-09-22.

What to Verify Next

Any prospective transaction should independently confirm the identity of the domain seller or broker through registrar-controlled or offline channels rather than relying solely on the parked page. If the domain is intended for a regulated or financial use, the proposed operator should be checked against the relevant jurisdiction’s corporate and licensing registries before deployment. Security teams should also resolve the external blacklist findings and obtain a clean, independently repeatable assessment before permitting the domain in trusted workflows.

EVIDENCE

- The homepage identifies a domain-sale purpose rather than an operating business.
- No active forms, login mechanisms, external posts, wallet activity, or sensitive-input workflows were observed during two successful behavioral runs.
- The available regulatory context contains no verified operator identity or licensing signal.

Summary Verdict

The overall posture is **critical risk**, with the available evidence insufficient to support trusted engagement or an independently verified operator identity. The external threat and blacklist findings control the assessment despite the absence of active transaction functionality on the current page.

Infrastructure Integrity

The site resolves through Network Solutions Hosting, LLC in the United States, with no CDN detected and one likely origin IP identified. This exposes a conventional hosting posture rather than demonstrating an active protective edge service; infrastructure characteristics do not offset the reputation findings.

EVIDENCE

- Hosting: AS19871, Network Solutions Hosting, LLC, US.
- Network posture: 2 unique IPs, 0 edge IPs, and 1 likely origin IP; CDN not detected.
- Transport: DV TLS certificate issued by YR1, valid to 2026-09-22.

Closing Assessment

The domain should remain outside trusted login, credential, payment, and other sensitive workflows until the external detections, proposed operator identity, and intended business use have been independently resolved.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2casas.com.

- The request stayed on 2casas.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by hostgator.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-12. NOTED
- The earliest public archive of this site is from 2004-02-26. CLEAR
- It is hosted on NETWORK-SOLUTIONS-HOSTING, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2casas.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
