

Is 2cs.com.br a scam? TrustSniffer's high-risk assessment: 0/100

2cs.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

2cs.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate product site for 2CS and its Eyecron observability platform. Describes features, modules, pricing tiers (community to enterprise), documentation links, contact details, and legal/privacy notices. Includes a portal/login entry point and claims enterprise-grade security (TLS 1.3).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://2cs.com.br/

What 2cs.com.br served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

2CS is a corporate technology website presenting Eyecron, an observability and infrastructure-monitoring SaaS platform for servers, containers, APIs, cloud workloads, logs, metrics, traces, SIEM, threat detection, automation, and enterprise deployments. Its apparent business model is subscription-based software, with community, paid, and enterprise offerings, supported by documentation, contact, legal, portal, and login functions.

Scam/Impersonation Risk

The site presents a coherent corporate SaaS proposition and the observed page behavior did not show credential harvesting, hidden forms, wallet activity, cloaking, or suspicious external submissions. However, this positive page-level presentation is outweighed by confirmed external threat detections: the domain is **blacklisted**, with malicious classifications from multiple sources, including detections associated with Fortinet and Sophos. The available evidence does not establish brand impersonation, phishing behavior on the captured page, or an identity contradiction involving multiple legal-entity names, but the confirmed blacklist status creates

a material risk for sensitive interaction. The site also presents a login entry point, making the external reputation signal directly relevant to credential security.

EVIDENCE

- External reputation assessment recorded 12 malicious and 1 suspicious detections, with Fortinet and Sophos identified among the flagged vendors.
- The domain was recorded as present on an external blacklist; Google Safe Browsing separately reported no malicious finding.
- The homepage contains a login form, while behavioral testing recorded 0 hidden forms, 0 external password posts, 0 wallet-provider detections, and 0 suspicious inline scripts.

Regulatory Verification Notes

The About and product content identifies 2CS as a Brazilian technology company and describes Eyecron as a commercial observability and monitoring platform. The site provides pricing, contact information, documentation, and legal/privacy notices, but the available material does not state a licensing authority or license number; for this type of software business, that is a disclosure and verification matter rather than proof of misconduct. Independent identity verification remains incomplete, so the on-site company description should not be treated as conclusive proof of the real-world operator. The domain's historical record also requires careful provenance interpretation: archived activity is recorded from 2002 through 2026, while the registration record is dated 2024, without evidence in the supplied material that the present operator controlled the domain throughout the older period.

EVIDENCE

- The homepage and About content describe 2CS as a Brazilian technology company specializing in observability and infrastructure monitoring.
- The site includes pricing, contact, documentation, legal, and privacy pages, but no license authority or license number is stated in the supplied page findings.
- Registration record: 2024-11-11, approximately 1.77 years old; archive record: 26 snapshots spanning 2002–2026, covering 25 years of tracked activity.
- The transport certificate is issued by WE1, uses DV validation, and is valid through 2026-09-24.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm the legal entity, operating address, and responsible personnel through a reliable corporate registry or an offline channel. Any claimed enterprise contract, software download, or support engagement should be validated through independently obtained contact details and controlled technical review. The official support and contact channels should also be confirmed independently, and any login should be deferred unless the domain's security and reputation status has been satisfactorily resolved.

EVIDENCE

- The supplied identity assessment records the operator connection as unverified.
- The site provides corporate, contact, legal, and privacy material that can be compared against independent registry records.
- The site's portal and login functions create a sensitive interaction surface requiring separate validation from the marketing content.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction on the evidence supplied. The site's professional presentation and benign captured-page behavior do not overcome the confirmed external reputation contradiction, and the real-world operator identity remains unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed CDN edge servers and a potential origin candidate. This provides a mitigating layer against direct exposure and common network abuse, but it is an infrastructure control rather than evidence that the site or its operator is legitimate.

Closing Assessment

Prospective users should not log in, submit credentials, download software, or conduct financial or contractual activity through the site until independent identity validation and resolution of the external security detections have been completed.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence

50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2cs.com.br.

- The request stayed on 2cs.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-11. NOTED
- The earliest public archive of this site is from 2002-05-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2cs.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
