

Is 2ms.pt a scam? TrustSniffer's high-risk assessment: 0/100

2ms.pt

Verdict

0

OUT OF 100

CRITICAL RISK

2ms.pt shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Small Portuguese real-estate portfolio site (2ms) with address, email geral@2ms.pt and phone +351 253 775 237; lists multiple properties and navigation items.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a small Portuguese real-estate portfolio website presenting residential property listings, portfolio navigation, and direct contact details for a business apparently seeking property-sale or client-lead opportunities rather than processing transactions directly online.

Scam/Impersonation Risk

The site's captured content presents a coherent real-estate purpose and contains no login form, sensitive-data form, or apparent brand-impersonation feature. However, the domain is subject to a confirmed external blacklist signal, with malicious and suspicious detections from multiple security providers; this is a material contradiction that outweighs the otherwise ordinary presentation. No conflicting legal-entity names were identified across the captured pages, but the absence of an on-page impersonation pattern does not resolve the external threat findings. Sensitive interaction should therefore be treated as unsafe pending independent resolution.

EVIDENCE

- External reputation telemetry records the domain as blacklisted, with 15 malicious and 2 suspicious detections; Fortinet, Kaspersky, and Sophos were among the flagged providers.
- The homepage capture returned HTTP 200 and displayed property-listing content, while behavioral analysis recorded no login form, hidden form, wallet activity, or password-submission form.
- Domain age is 11.356605065023956 years; archival coverage contains 24 snapshots from 2015-04-10T09:30:35Z through 2025-04-04T22:35:58Z, spanning 11 years.

Regulatory Verification Notes

The available site content identifies Portugal and provides a business address and contact details, but the operator's real-world identity remains independently unverified. The captured pages do not state a licensing authority or license number, creating a regulatory-disclosure gap for a real-estate business; this is a verification issue rather than, by itself, proof of fraud. The site's valid transport encryption and established historical presence are positive technical indicators, but they do not countermand the external blacklist assessment or establish legal authorization.

EVIDENCE

- The site's contact and portfolio content identifies Portugal, Moreira de Cónegos, and an address on Avenida Santa Marta.
- Hosting telemetry records AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site uses a valid DV TLS certificate issued by WE1, expiring 2026-10-19T10:13:08+00:00.
- No licensing authority or license number is stated in the captured site content.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the operator's legal identity, authority to market each property, and the applicable Portuguese real-estate registration or licensing status using authoritative records rather than relying solely on the website. Contact details should be validated through an independent offline or third-party source, and any proposed deposit, contract, or payment arrangement should be reviewed through established legal and payment-protection channels.

EVIDENCE

- The captured navigation exposes Home, Portefólio, and Contacto pages but provides no separate captured legal, terms, or licensing page.
- The business model is presented as property listings and client contact, with no online payment or sensitive submission form observed.

Summary Verdict

The overall posture is critical, with a confirmed external reputation contradiction and unresolved operator verification concerns. The ordinary real-estate presentation is insufficient to support trust for credentials, account access, or financial interaction.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses are CDN edge servers associated with AS13335; no origin-server candidate was observed. This reduces direct exposure of the underlying host but is only a mitigating infrastructure characteristic, not evidence that the website or operator is legitimate.

Closing Assessment

Use should remain read-only; login, credential submission, and financial transactions should be withheld until the independent identity, authorization, and reputation concerns have been resolved.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2ms.pt.

- The request stayed on 2ms.pt. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2015-04-10. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2ms.pt at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
