Full analysis

Overview

2rreklam.com currently presents a default Plesk-generated hosting landing page rather than an operating business website. Visitors see links and marketing material for Plesk, Sitejet Builder, WP Guardian, and related hosting resources; the page contains no substantive service offering, payment flow, or apparent customer-facing business model.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material contradiction to the otherwise benign appearance of the landing page and warrants a security-forward posture for sensitive interaction. The observed page itself shows no login form, credential-harvesting mechanism, financial solicitation, or brand-impersonation indicators, and the historical record shows continuity rather than suspicious repurposing; those factors reduce the evidence of an active scam mechanism but do not offset the external reputation finding. No identity contradiction, phishing indicator, or impersonation of a named brand was observed on the supplied page. The available identity linkage remains only apparent rather than independently verified.

EVIDENCE

- The homepage is identified as a default Plesk “Domain Default page” for 2rreklam.com and contains no forms or payment flow.
- External reputation data records a confirmed blacklist hit; separate detections record 1 malicious and 1 suspicious result.
- Archive history records 50 snapshots spanning 2012–2025, covering 14 tracked years, with no confirmed suspicious repurposing.

Regulatory Verification Notes

The page is an informational hosting placeholder, not a substantive legal or regulated-service presentation. It does not provide a meaningful operator profile, licensing statement, registration number, or regulatory disclosure for an underlying business; this is a transparency gap requiring independent confirmation rather than proof of misconduct. The domain is registered through ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi, and its long registration history provides administrative continuity, while the available evidence does not independently verify the real-world operator or any regulated status. The matched-broker check returned no match, which is contextual reassurance only and is not a licensing determination.

EVIDENCE

- The homepage title is “Domain Default page,” and its substantive content is limited to Plesk, Sitejet Builder, WP Guardian, and hosting guidance.
- Domain registration: 2013-10-02; age 12.88 years; registrar: ODTU Gelistirme Vakfi Bilgi Teknolojileri Sanayi Ve Ticaret Anonim Sirketi.
- TLS certificate: issuer YR1; DV validation; valid to 2026-10-08T08:25:26+00:00.

What to Verify Next

Before any login, credential submission, payment, or other sensitive interaction, the intended operator should be confirmed through independent corporate or regulatory records rather than through the placeholder page alone. The hosting account owner should also confirm that this domain is the intended official endpoint and that the Plesk landing page has not been left in place unintentionally. Any future business, service, or regulated-activity claims should be assessed only against independently validated legal-entity and licensing information.

EVIDENCE

- The homepage states that it was generated by Plesk and directs a site owner to log in to Plesk to create websites and configure hosting.
- The homepage provides no substantive business, legal, licensing, or customer-support content against which the claimed operator could be validated.
- The site’s visible external references point to Plesk and Facebook, not to an independently documented operator identity.

Summary Verdict

The site has a **moderate-trust classification with elevated risk for sensitive interaction**. Its established technical and historical footprint is outweighed for decision purposes by the confirmed external reputation contradiction, while the real-world operator remains only apparently connected rather than independently verified.

Infrastructure Integrity

The site resolves directly to a single origin address with no detected CDN or WAF layer. It is hosted by NiobeBilisimHizmetleri - Niobe Bilisim Ltd. Sti., Türkiye, which provides identifiable infrastructure context but is only a mitigating technical fact and does not establish legitimacy.

EVIDENCE

- Served from AS42868 (NiobeBilisimHizmetleri - Niobe Bilisim Ltd. Sti., TR); 1 unique IP and 1 likely origin IP were observed, with no CDN detected.
- TLS certificate uses issuer YR1 with DV validation and expires 2026-10-08T08:25:26+00:00.

Closing Assessment

Sensitive actions should remain suspended until the endpoint, operator identity, and intended purpose of the domain have been independently confirmed through trusted offline or authoritative channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2rreklam.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
