Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

2TON is a Palm Beach creative and digital agency website presenting branding, web design and development, SEO, content, security, performance, and digital marketing services, supported by portfolio work, lead-generation forms, and a client-contract, retainer, and project-fee business model.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions were observed. The homepage presents a coherent agency proposition, named portfolio projects, business contact channels, social links, and ordinary contact and newsletter forms; it does not present login functionality, financial-return claims, cryptocurrency activity, or other abuse-oriented mechanics. The domain also has continuous historical presence consistent with an established web property. One external reputation assessment recorded a suspicious result, but the available evidence shows no malicious result, blacklist finding, or abuse report, making that an isolated and unconfirmed reputational signal rather than evidence of impersonation. The website remains apparently legitimate, while the real-world operator identity is not independently verified.

EVIDENCE

- Homepage content identifies 2TON as an “Award-Winning Creative Agency” and describes branding, strategy, development, SEO, security, performance, and content services.
- Domain registration records show creation on 2003-06-30T19:51:27Z and an age of 23.15 years.
- Historical web records show 133 snapshots spanning 2003–2026, with 24 years tracked.
- External reputation checks recorded 0 malicious detections, 1 suspicious result, no blacklist finding, and 0 abuse reports.

Regulatory Verification Notes

The site operates as a creative-services agency rather than presenting itself as a regulated financial or investment provider. No license, regulatory authority, or registration number is claimed in the supplied business information; this is a transparency item for ordinary commercial due diligence, not evidence of a scam. The registration is through GoDaddy.com, LLC, while the listed registrant is private, an administrative limitation that contributes to the remaining uncertainty around independent operator identification. Transport security is present through a domain-validated certificate issued by YR1. The available page content provides business services and contact information, but the legal-entity disclosure state is unclear.

EVIDENCE

- Domain registration lists GoDaddy.com, LLC as registrar; the registrant is recorded as Registration Private through Domains By Proxy, LLC.
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid to 2026-11-04T23:50:58+00:00.
- The homepage and contact content describe commercial agency services but do not state a license authority or license number.

What to Verify Next

Before a commercial engagement, independently match the agency's stated identity and physical address against an authoritative business registry and obtain a callback through a separately sourced official channel. The proposed statement of work should identify the contracting entity, deliverables, payment schedule, cancellation or refund terms, and dispute route; any payment should use a method providing appropriate transaction protection. Credential or payment interactions should follow those ordinary identity, contract, and payment-protection checks.

EVIDENCE

- Independent verification should focus on the legal entity and address associated with the proposed contract, rather than relying solely on the website's own claims.
- Payment review should confirm contractual protections and the available cancellation, refund, and dispute mechanisms before funds or sensitive information are exchanged.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam or impersonation contradictions were observed, but the positive classification does not independently prove the real-world operator’s legal identity.

Infrastructure Integrity

The site resolves directly to Google Cloud Platform infrastructure in the United States, with no CDN detected and likely origin addresses visible. Google Cloud hosting is a mitigating infrastructure signal for operational stability, but hosting infrastructure alone is not proof of legitimacy.

EVIDENCE

- Served from AS396982 (GOOGLE-CLOUD-PLATFORM – Google LLC, US).
- Technical resolution identifies 3 unique IP addresses, all assessed as likely origin addresses, with 0 edge IP addresses detected.

Closing Assessment

Proceed with ordinary commercial due diligence before submitting credentials or making payments, with particular attention to independently confirmed identity, contractual protections, and payment safeguards.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 2ton.com.

- The request stayed on 2ton.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-30. NOTED
- The earliest public archive of this site is from 2003-08-12. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 2ton.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
