

Is 3011h3011.com a scam? TrustSniffer's high-risk assessment: 0/100

3011h3011.com

Verdict

0

OUT OF 100

CRITICAL RISK

3011h3011.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Minimal login/registration page for a site using the Bet365 name in Chinese; requests username, password, phone number and invitation code with little contextual information or verifiable credentials.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What 3011h3011.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Google, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal Chinese-language online gambling and betting portal presented under the Bet365 name. It offers account login and registration, requests personal and contact information together with an invitation code, and appears intended to obtain user registrations for betting activity and associated deposits.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Multiple external threat-intelligence sources have identified the domain as malicious or blacklisted, including a malicious Safe Browsing result and numerous malicious detections. These findings converge with the homepage’s login-only design, limited business context, sensitive registration form, untrusted form destination, and apparent deposit-before-service model. The page uses the Bet365 name, but the available evidence does not independently establish authorization by that brand or verify the real-world operator. The site’s historical continuity and technical validity do not offset the confirmed reputation contradictions. Evidence:

- The homepage is a 259-character login and registration page requesting a username, password, real name, mobile number, verification code, and invitation code.
- The homepage contains one sensitive form with an untrusted destination and provides little contextual information about the service or operator.
- External reputation checks record a confirmed blacklist status, a malicious Safe Browsing match, and 22 malicious detections.
- Domain registration evidence records creation on 2021-01-04T07:11:49Z and an age of 5.62 years; the registrar is GoDaddy.com, LLC.

Regulatory Verification Notes

The homepage makes a purported regulatory disclosure and displays a copyright statement for a “BET365 network company,” but it does not provide independently verifiable evidence connecting those claims to a licensed operator. The stated gambling service therefore has an unresolved regulatory and identity-verification gap. A long-established registration record and sustained archival presence are positive provenance signals, but they do not validate the operator, licensing claims, or authorization to use the Bet365 name. Evidence:

- The homepage displays the purported permit identifier “B2-20080868” and describes it as an internet telecommunications business license, without an independently verifiable registry reference.
- The domain has 38 archive snapshots spanning 2021-11-23T12:12:28Z through 2026-02-21T06:36:55Z, with 6 years tracked.
- The site is served from AS132825 (MYTEK-AS-AP - MYTEK TRADING PTY LTD, AU).
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-09-03T08:57:20+00:00, with 15 days remaining.

What to Verify Next

Before any account, credential, or financial interaction, an independent regulatory check should confirm whether the permit identifier corresponds to the actual operator and authorizes online gambling in the relevant jurisdiction. The claimed Bet365 relationship should also be confirmed through an official, independently sourced brand channel rather than through links or contact details supplied by this website. Until those checks succeed, no registration, credential submission, deposit, or transfer should occur. Evidence:

- The regulatory registry should independently validate “B2-20080868,” the stated business activity, and the legal entity to which it is issued.
- An official brand-controlled source should confirm whether this domain is an authorized Bet365 service.
- The homepage’s limited context and absence of independently linked corporate or regulatory verification material require external confirmation before sensitive use.

Summary Verdict

The site should be treated as an untrusted and potentially harmful destination for sensitive interactions. The combination of confirmed blacklist and malicious detections, a credential-collection page with minimal context, and an unverified operator identity supports the critical risk posture.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed addressing is consistent with CDN edge service rather than direct origin exposure. This provides a mitigating layer against some network-

level exposure, but it is only an infrastructure control and does not establish site legitimacy or counter the external threat findings.

Closing Assessment

The appropriate posture is to avoid login, registration, credential submission, and financial activity unless independent regulatory and brand-authority checks materially resolve the identified concerns.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by page content, registration and ownership, governance, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3011h3011.com.

- The request stayed on 3011h3011.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-01-04. [CLEAR](#)
- The earliest public archive of this site is from 2021-11-23. [CLEAR](#)
- It is hosted on MYTEK-AS-AP, from a server in HK. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3011h3011.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
