

Is 3011s3011.com a scam? TrustSniffer's high-risk assessment: 0/100

3011s3011.com

Verdict

0

OUT OF 100

CRITICAL RISK

3011s3011.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A mostly Chinese-language login and registration page labeled as 'Bet365 - 官方直营' asking for username, password, real name, phone number, verification code and an invitation code. Minimal explanatory content or verifiable credentials presented; contact phone number shown but overall presentation resembles an account capture for an online betting service and may impersonate the known Bet365 brand.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://3011s3011.com/

What 3011s3011.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents a mostly Chinese-language online betting and gambling portal branded “Bet365 - 官方直营.” Its visible purpose is to register and authenticate users for wagering, with the landing page focused on account creation, verification, and likely deposit-funded betting rather than explaining the service or establishing its operating identity.

Scam/Impersonation Risk

Confirmed contradiction signals create a critical risk posture. The site is blacklisted, with multiple external security assessments identifying malicious activity, including 21 malicious detections and flags from three tier-one security providers. The homepage is effectively a login and registration capture: it requests a username, password, real name, mobile number, verification code, and invitation code, while the form submits to an

untrusted destination. The use of a Bet365-branded title on an unrelated-looking domain creates a material brand-impersonation concern, although the supplied evidence does not independently confirm the real-world operator or establish a direct identity match. The combination of a login-only presentation, deposit-before-service behavior, minimal context, and security detections is consistent with a site that should not receive credentials, personal information, or funds.

EVIDENCE

- Homepage: displays the title “Bet365 - 官方直营” and provides a sensitive login and registration form requesting account, identity, telephone, verification, and invitation-code data.
- Homepage behavior: recorded 21 malicious detections, with three tier-one security providers flagging the domain; the domain is also subject to a confirmed blacklist status.
- Domain history: registered 2021-01-04 and approximately 5.62 years old; five archive snapshots span 2021–2026 across six years tracked.

Regulatory Verification Notes

The page footer presents an alleged value-added telecommunications permit and general website qualification wording, but the supplied content does not establish a verified gambling authorization, regulator, or independently confirmed legal operator. Identity verification remains incomplete, and the page provides too little substantive business information to connect the betting service to a real-world entity. The domain is registered through GoDaddy.com, LLC, which is an established registrar, and the site has a valid transport certificate; these are technical or administrative facts and do not validate the betting authorization or the operator’s claims. A third-party broker-intelligence check produced no name match, which provides no affirmative regulatory support.

EVIDENCE

- Homepage footer: claims “增值电信业务经营许可证” status and website qualification evidence, but does not provide a verified gambling-regulator determination in the supplied material.
- Registration record: registrar identified as GoDaddy.com, LLC; creation date 2021-01-04 and expiry date 2028-01-04.
- Site transport encryption: TLS certificate issued by YR1, validation level DV, valid to 2026-09-03.

What to Verify Next

Before any interaction, an independent check should confirm whether the official Bet365 organization recognizes this domain as an authorized property. Any claimed gambling or telecommunications authorization should be checked directly against the relevant regulator’s registry using independently obtained contact details, not links or numbers supplied by the site. Enterprise controls should block credential submission and payment activity for this domain pending those checks, while preserving the page and network indicators for incident-response or fraud-monitoring purposes. Official support and contact channels should be confirmed through an independent, offline route.

EVIDENCE

- Homepage: provides minimal service explanation and emphasizes immediate registration, with no independently verifiable operator profile.
- Registration form: requires sensitive identity and account information before the service's legal basis and operating entity are established.
- Page behavior: six external requests and four external POST requests were observed, all classified as non-whitelisted in the supplied analysis.

Summary Verdict

The overall posture is critical, with sensitive interaction risk supported by converging page-level and external threat indicators. The website's apparent betting purpose and brand presentation cannot be treated as evidence of an authorized or legitimate operator, and its identity remains unverified.

Infrastructure Integrity

The site is served behind Cloudflare CDN/WAF protection, which provides a mitigating layer against direct exposure but does not establish legitimacy. Observed addresses were CDN edge infrastructure, while the origin server was not observable; this arrangement can also permit rapid content changes without independently revealing the underlying host. The identified hosting organization is MYTEK-AS-AP - MYTEK TRADING PTY LTD, AU.

EVIDENCE

- Hosting infrastructure: served from AS132825, MYTEK-AS-AP - MYTEK TRADING PTY LTD, AU.
- Network posture: two observed IP addresses were identified as CDN edge addresses, with zero likely origin candidates.
- Transport encryption: DV TLS certificate issued by YR1, valid until 2026-09-03.

Closing Assessment

Prospective users and organizations should refrain from submitting credentials, personal data, or funds through the site; any necessary review should remain limited to non-interactive observation until independent brand and regulatory checks produce authoritative confirmation.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by page content, registration and ownership, governance, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise.
Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- A form on the page submits to a destination TrustSniffer could not verify.
Page content rule:PAGE_FORM_UNTRUSTED_DEST
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3011s3011.com.

- The request stayed on 3011s3011.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-04. CLEAR
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on MYTEK-AS-AP, from a server in HK. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3011s3011.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
