

Is 30px.net a scam? TrustSniffer's high-risk assessment: 0/100

30px.net

Verdict

0

OUT OF 100

CRITICAL RISK

30px.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Landing page for '鸿博体育' promoting sports-betting services around the 2026 World Cup with registration CTAs, app links, and promotional/rebate claims. Lacks verifiable regulatory or legal identity and contains promotional language encouraging deposits.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://30px.net/

What 30px.net served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at 30px.net is a Chinese-language landing page branded 鸿博体育 that presents online sports betting and casino-style entertainment tied to the 2026 World Cup, with registration prompts, app links, promotional rebates, and claims of an official platform role; its apparent business model is to attract users to wagering accounts and deposits.

Scam/Impersonation Risk

The site presents several direct-risk characteristics: it encourages registration and deposits before any service is delivered, promotes high rebates, provides limited evidence for its claims, and does not establish a verifiable operator or contact location. Its claim to be the “2026 World Cup official designated platform” is unsupported within the reviewed content and creates material claim-evidence dissonance. Independent threat intelligence records malicious detections and a confirmed **blacklist** hit, which are the principal reasons for the critical interaction risk. A similarity heuristic associated the page with x.com, but the structured assessment does not classify this as confirmed brand impersonation; no conflicting legal-entity names are recorded.

EVIDENCE

- The homepage promotes “2026 World Cup official designated platform,” registration, app downloads, and high-rebate incentives without supporting accreditation or operator evidence.
- The homepage is assessed as a gambling or sports-betting landing page with deposit-before-service, aggressive promotional, opaque-value-flow, claim-evidence, and unverifiable-contact indicators.
- Current registration record: created 2024-11-19T08:47:35Z; age 1.75 years; registrar GoDaddy.com, LLC.
- Historical archive: 50 snapshots spanning 2007-12-07 to 2026-06-11, covering 20 years.

Regulatory Verification Notes

The reviewed content does not identify a licensing authority, license number, legally accountable operating entity, or verifiable regulatory basis for the betting service. This is a significant transparency and verification gap for a platform soliciting deposits. The registration through GoDaddy.com, LLC is an administrative fact and does not establish that the gambling activity is licensed. The available reputation evidence should be treated as a serious external risk signal rather than as a legal or regulatory determination.

EVIDENCE

- The homepage contains no verifiable licensing authority or license number and does not provide a clearly accountable legal operator.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-11-01T12:39:59+00:00.
- Hosting resolves to AS134175, SH2206-AP - UNIT A17,9/F SILVERCORP INT_L TOWER 707-713 NATHAN RD, HK.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm the operator's legal name and gambling authorization with the relevant jurisdictional regulator, using registry information obtained outside the site. Any proposed payment route, withdrawal process, and promotional terms should be checked for a named beneficiary, enforceable conditions, and consumer-protection coverage. App downloads and support channels should also be validated through independently sourced official channels rather than through the landing page.

EVIDENCE

- The homepage's official-platform claim should be checked against the relevant sports-event rights holder and gambling regulator.
- The registration and deposit prompts require independent confirmation of the beneficiary, withdrawal terms, and applicable consumer protections.
- The homepage's app links and customer-service claims should be validated through an offline or independently sourced contact route.

Summary Verdict

The overall posture is **critical trust risk** and the site is unsuitable for login, credential submission, or financial interaction. The apparent commercial presentation does not provide a reliable basis for treating the service as legitimate, while the external threat evidence materially outweighs the limited technical and historical indicators of site continuity.

Infrastructure Integrity

The site resolves directly to a likely origin IP, with no CDN indicated, and is hosted in Hong Kong on AS134175 under SH2206-AP - UNIT A17,9/F SILVERCORP INT_L TOWER 707-713 NATHAN RD, HK. The infrastructure is technically reachable and uses transport encryption, but those properties are only mitigating technical characteristics and do not offset the reputation risk.

Closing Assessment

Prospective users and enterprise controls should block sensitive interaction with the site, prevent deposits and credential submission, and preserve any related transaction or communication records for security review.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 30px.net.

- The request stayed on 30px.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-19. NOTED
- The earliest public archive of this site is from 2007-12-07. CLEAR
- It is hosted on SH2206-AP, from a server in HK. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 30px.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
