

# Is 30v.co safe? TrustSniffer's moderate-trust assessment: 69/100

30v.co

## Verdict

69

OUT OF 100

MODERATE TRUST

30v.co is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

A multi-topic blog (30v) publishing posts about health, skincare, technology, DIY beauty, weight loss and related topics. The site appears informational with an ecommerce/shop section and listing of posts; there are no signs of credential harvesting, financial yield promises, or impersonation.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

What 30v.co served when TrustSniffer captured it on 2026-08-18. The page may look different now.

## Key findings

- Automated classification: Governance Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

30v.co is a multi-topic informational blog presenting articles on health, skincare, technology, education, entertainment, DIY beauty, and weight loss, alongside an ecommerce or shop section; its apparent business model is content publishing supported by advertising, affiliate activity, and possible product sales rather than financial services or custodial money flows.

### Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions were observed. The reviewed pages contain no login form, credential-collection mechanism, financial-yield promise, wallet interaction, or untrusted form destination. One external reputation screening result was classified as suspicious, but it was unconfirmed and is not corroborated by the page content, which showed no malicious detections or other abuse pattern. Four suspicious inline scripts were observed during technical behavior testing; this is a limited implementation anomaly rather than evidence of impersonation or a confirmed scam. The domain has also maintained a documented web presence across multiple years, with no suspicious repurposing identified in the available historical assessment.

#### EVIDENCE

- The homepage and article pages present health, skincare, technology, and lifestyle publishing, with no login form or sensitive input form detected.
- External screening recorded 0 malicious detections, 1 unconfirmed suspicious result, and no confirmed phishing or impersonation finding.
- Registration records show creation on 2021-09-23, with an age of 4.9 years.
- Web archives contain 80 snapshots spanning 2016–2025, with 10 years tracked.

#### Regulatory Verification Notes

The site presents as a general content publication rather than a regulated financial provider. The supplied pages do not state a corporate registration, financial license, or regulatory authorization; this is a disclosure gap relevant mainly to any commercial activity conducted through the shop, not evidence of fraud. The operator's real-world identity remains unverified, so the site's apparent legitimacy should not be treated as proof of a specific legal entity. Positive technical and continuity signals support an established-site interpretation: the domain is registered through GoDaddy.com, LLC, transport encryption is active with a known issuer, and the hosting identity is technically resolved. The available third-party broker context produced no match, and the broader reputation evidence does not show a confirmed malicious classification.

#### EVIDENCE

- The homepage identifies the service as a broad information website and includes an ecommerce shop, without presenting a regulated-services claim or license number.
- The domain registrar is GoDaddy.com, LLC; the recorded registration expires on 2026-09-23.
- The site is served from AS150055, DIGITAL SNAP, IN; the registry is APNIC and the recorded country is India.
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-05T21:30:10+00:00.

#### What to Verify Next

Before a purchase or other sensitive interaction, independently confirm the shop's legal seller name, returns and refund terms, delivery obligations, and payment-protection arrangements. Any health or skincare claims should be assessed against authoritative medical or consumer-health sources rather than relied upon solely as editorial content. Official support and contact channels should be confirmed through an independent route, and account creation should be limited to information necessary for the intended service.

#### EVIDENCE

- The homepage and article listings show a broad editorial scope, including skincare, diet, weight loss, and technology topics.
- The shop is exposed as a separate commercial function from the informational article content.
- Behavioral testing completed 2 successful runs and detected no wallet connection, password submission to an external form, hidden form, or clipboard-hijacking activity.

## Summary Verdict

The overall posture is **moderate trust**: the website appears consistent with a functioning informational publication and no confirmed scam or impersonation indicators were identified. Confidence is not high enough to treat the operating identity as independently established, and isolated technical and external-reputation signals justify verification before sensitive or high-value engagement.

## Infrastructure Integrity

The site resolves directly to one likely origin IP, with no CDN detected in the supplied infrastructure assessment. This means there is no identified edge-layer CDN or WAF posture to treat as an additional mitigating control; direct hosting is nevertheless a neutral infrastructure characteristic and not evidence of abuse.

## Closing Assessment

Ordinary browsing is proportionate, while independent confirmation of merchant details, payment protections, and official contact channels should precede purchases, account creation, or other sensitive actions.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

### 01 Governance Risk

- The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE

### 02 Dynamic Interaction Caution

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.  
Behaviour in a sandbox rule:BEHAV\_SUSPICIOUS\_INLINE\_SCRIPTS

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of 30v.co.

- The request stayed on 30v.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by herosite.pro, across 2 name servers. NOTED
- The registration is paid up to 2026-09-23. NOTED
- The earliest public archive of this site is from 2016-03-07. CLEAR
- It is hosted on DIGISNAP-AS-IN, from a server in IN. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about 30v.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
