Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a short Chinese-language promotional landing page for “K8,” presenting itself as a top-tier online casino and entertainment platform with reliability, reputation, and large-payout assurances; its apparent business model is to attract users to gambling services funded through player deposits and wagering.

Scam/Impersonation Risk

Contradictory risk signals are present and are sufficiently serious to make sensitive interaction inappropriate. External security assessments recorded a confirmed blacklist hit and multiple malicious detections, while the homepage combines urgent promotional language with deposit-before-service mechanics, opaque value flows, and claims that are not supported by visible evidence. The landing page promotes “K8凯发·天生赢家” and describes the service as an “亚洲顶级在线娱乐平台” and “官方实力直营品牌·信誉保障·大额无忧,” but supplies no substantiation for those assurances. This convergence supports a clearly cautionary assessment; the presence of valid transport encryption does not offset the external threat detections or the site’s unsupported gambling claims.

EVIDENCE

- External reputation checks recorded 17 malicious detections, a confirmed blacklist hit, and 0 suspicious detections.
- The homepage is classified as a gambling/casino promotional landing page and contains the red flags “deposit_before_service,” “opaque_value_flow,” “claim_evidence_dissonance,” and “aggressive_high_yield_promises.”
- The domain record shows registration dated 2026-08-17 with a reconciled age of 2.56 years; archival records contain 15 snapshots spanning 2024–2025 across 2 tracked years.

Regulatory Verification Notes

The site’s apparent gambling activity requires confirmation of the responsible legal operator and applicable gambling authorization, but the captured homepage does not visibly provide a license, licensing authority, registration number, corporate identity, contact details, or transactional disclosures. The independently verified identity of the operator remains unestablished. The registrar record identifies Spaceship, Inc.; that administrative fact does not establish ownership, licensing, or suitability to accept deposits. A valid domain certificate and mainstream hosting infrastructure are technical conditions only and should not be interpreted as regulatory approval.

EVIDENCE

- The homepage provides no visible gambling license, regulator, license number, or corporate operator disclosure.
- The domain registration record names Spaceship, Inc. as registrar.
- The site is served from AS13335 (Cloudflare, Inc., US).
- The TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-15T08:27:52+00:00.

What to Verify Next

Before any sensitive interaction, an independent review should confirm the operator’s legal entity and gambling authorization directly through the relevant jurisdictional regulator, rather than relying on assurances displayed by the site. Payment recipients, withdrawal conditions, dispute procedures, and age or jurisdiction restrictions should also be validated through independently sourced channels. Any later request for credentials, payment details, or software installation should be treated as a material escalation from the currently captured landing page.

EVIDENCE

- The captured homepage contains no login form, sensitive form, or visible transaction form.
- Browser testing recorded 4 external XHR requests and 4 external POST requests, including 2 non-whitelisted XHR requests and 2 non-whitelisted POST requests.
- The observed page behavior included promotional claims and urgent conversion-style language.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. Available evidence does not establish a trustworthy operating identity or a legitimate basis for the site’s commercial assurances, and the external threat findings materially outweigh its routine technical characteristics.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, with all observed addresses associated with Cloudflare edge infrastructure and no origin candidate identified in the analysis. This provides a mitigating network-control signal and limits direct origin exposure, but it does not validate the site’s operator, content, or business practices.

Closing Assessment

The appropriate institutional posture is to avoid login, credential submission, deposits, payments, and other sensitive actions on the site, and to escalate any related interaction for independent security and regulatory review.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3115ee.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
