

Is 3115kk.top a scam? TrustSniffer's high-risk assessment: 0/100

3115kk.top

Verdict

0

OUT OF 100

CRITICAL RISK

3115kk.top shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Short Chinese-language promotional landing page for an online casino brand (K8). Text emphasizes being a top Asian online entertainment platform and credibility, but provides no verifiable regulatory or contact information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://3115kk.top/>

What 3115kk.top served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a short Chinese-language promotional landing page for the K8 online casino brand, presenting itself as a leading Asian online entertainment platform and promoting direct operation, credibility assurance, and worry-free large withdrawals; its apparent business model is to attract users to gambling activity funded through deposits and wagers.

Scam/Impersonation Risk

The site presents a **critical interaction risk**. Independent threat-intelligence checks identified the domain in confirmed blacklist records, including a substantial malicious-detection result and a Tier-1 security-vendor flag; this is a direct contradiction to the page's credibility claims. The homepage's extremely limited content provides no substantiation for statements equivalent to "top Asian online entertainment platform," "official directly operated brand," or "large withdrawals worry-free." No distinct legal-entity conflict or confirmed brand impersonation was observed, but the blacklist evidence is sufficient to make sensitive interaction inappropriate.

EVIDENCE

- The homepage is a 45-character promotional landing page titled “K8凯发·天生赢家,” with no substantive operating or ownership explanation.
- External reputation analysis recorded 14 malicious detections, 1 suspicious detection, and a confirmed blacklist status for the domain.
- Domain continuity records show registration on 2025-10-18, with an authoritative continuity age of 2.5544147843942504 years.
- Web-archive coverage contains 24 snapshots spanning 2024–2026, with 3 years tracked.

Regulatory Verification Notes

The homepage does not disclose a licensing authority, license number, legal operator, or verifiable contact address. For a gambling service that solicits deposits and wagers, this is a material regulatory-transparency gap rather than proof of illegality by itself. The site’s real-world operator remains unverified, and the available third-party broker dataset contains no matching record; neither point establishes authorization. The valid transport certificate and mainstream edge hosting confirm technical deployment, not regulatory legitimacy.

EVIDENCE

- The homepage contains promotional branding but no visible licensing or corporate disclosure.
- The site is served through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid until 2026-11-08T05:48:03+00:00.

What to Verify Next

Before any interaction involving funds or personal information, an institution should independently confirm the operator’s legal name and gambling authorization with the relevant jurisdictional regulator, using registry records rather than site-provided claims. The payment route, withdrawal terms, dispute process, and responsible-gambling controls should also be validated through independently sourced documentation. Official contact channels should be confirmed through an offline or otherwise independent route before any communication or account activity.

EVIDENCE

- The homepage provides no license authority or license number against which authorization can be checked.
- The published business presentation does not identify a verifiable operator or address.
- The site’s stated credibility and withdrawal assurances are promotional assertions without supporting credentials on the captured page.

Summary Verdict

The available evidence supports a critical trust posture and a clear presumption against sensitive interaction. The combination of confirmed external threat detections, unsupported gambling-related claims, and absent

operator substantiation outweighs the site's limited technical and historical continuity signals. Identity verification is incomplete, and legitimacy is not established.

Infrastructure Integrity

Cloudflare CDN/WAF protection is a mitigating infrastructure feature, but it is not evidence that the operator is legitimate. All observed addresses were CDN edge endpoints, so the hosting path does not independently establish the underlying service operator or server environment.

EVIDENCE

- Four observed IP addresses were Cloudflare edge endpoints on AS13335; no likely origin IP candidate was identified.
- Cloudflare, Inc. is the identified hosting provider and CDN/WAF provider.
- The observed TLS certificate uses WE1 with DV validation; transport encryption was present through 2026-11-08T05:48:03+00:00.

Closing Assessment

Sensitive actions should not proceed on this site; any required investigation should remain limited to non-interactive review until independent legal, regulatory, payment, and operator checks produce reliable corroboration.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3115kk.top.

- The request stayed on 3115kk.top. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-18. NOTED
- The earliest public archive of this site is from 2024-01-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3115kk.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
