

Is 322285.com a scam? TrustSniffer's high-risk assessment: 0/100

322285.com

Verdict

0

OUT OF 100

CRITICAL RISK

322285.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-18 by automated analysis. Classification confidence 70%.

What this site appears to be

Chinese-language domain navigation/parking page showing recent domain names and recommending browsers/routes for access. Minimal content and no transaction or login elements.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 322285.com served when TrustSniffer captured it on 2026-08-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Chinese-language domain-navigation and parking page for 322285.com. It displays recently collected domain names, route suggestions for telecommunications networks, and browser-access recommendations, with no visible transaction, login, or defined operating service.

Scam/Impersonation Risk

The site presents no clear brand impersonation, credential-collection form, or transaction mechanism in the observed page. However, the domain has confirmed blacklist status and multiple external malicious classifications, including detections from named security providers; these signals materially outweigh the otherwise limited and apparently benign page behavior. The page's minimal content and domain-parking presentation also provide little basis for establishing a legitimate operational purpose. No identity contradiction between legal entities was observed, but the confirmed blacklist position makes sensitive interaction inappropriate.

EVIDENCE

- The homepage is a minimal Chinese-language navigation page listing recent domains and access routes; no login or sensitive form was present.
- External reputation assessment recorded 14 malicious and 1 suspicious detections, with two tier-one security providers flagging the domain.
- The domain was recorded on external blacklists; a separate malicious-site reputation service did not report a hit.

Regulatory Verification Notes

The available page does not identify a legal operator, regulated activity, licence, or registration number. This is a material disclosure gap for any party considering reliance on the site, while the operator's real-world identity remains independently unverified. The domain registrar is Realtime Register B.V.; that administrative fact does not establish ownership, licensing, or legitimacy. The site's apparent parking and navigation function does not itself demonstrate a regulated business model, but any linked or subsequently presented service would require separate regulatory validation.

EVIDENCE

- The observed homepage contains no visible corporate identity, legal-entity disclosure, licence reference, or registration number.
- Registration records list Realtime Register B.V., creation date 2026-05-05, and an age of 0.29 years; archival continuity is recorded as 1.8507871321013005 years.
- Web archives contain 5 snapshots spanning 2024–2025, covering 2 years.
- Hosting was identified as AS979 (NETLAB-SDN - NetLab Global, US); the site's TLS certificate is DV, issued by YR1, and valid to 2026-10-13.

What to Verify Next

Before any sensitive interaction, an independent party should confirm that the intended destination is the correct official domain and that any linked service has a verifiable legal operator and applicable authorisation. Any payment, account, or credential request should be assessed only after those checks are completed through independently sourced contact and registry information rather than through the page itself.

EVIDENCE

- The page describes browser and network-route alternatives but does not explain the ownership or purpose of the listed destinations.
- No forms, external posts, external XHR requests, wallet connections, or password fields were observed during the assessed sessions.
- The page is classified as a domain-navigation or parking page and is marked as being offered for sale.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not support treating the site as a verified or trustworthy operating entity, and the external threat signals create a direct basis

for heightened security concern.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, with observed edge servers at 13.248.169.48 and 76.223.54.146; additional potential origin candidates were identified. This infrastructure may reduce direct exposure of the service, but it is only a mitigating technical control and does not offset the site's adverse reputation evidence.

EVIDENCE

- CDN/WAF protection was observed, with 2 identified edge IPs and 10 potential origin candidates among 12 resolved IPs.
- The observed edge servers are associated with AS16509.

Closing Assessment

Sensitive actions, including login, credential submission, financial activity, or reliance on linked destinations, should be withheld unless the domain and the relevant operator can first be independently authenticated through trusted channels.

Written analysis generated 2026-08-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 322285.com.

- The request for 322285.com ended on daohang13.3222850.buzz, a different domain. WATCH
- Registration is published under Realtime Register B.V.. CLEAR
- DNS for this domain is served by orderbox-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2024-10-10. CLEAR
- It is hosted on NETLAB-SDN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 322285.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
