

Is 33033.vip a scam? TrustSniffer's high-risk assessment: 0/100

33033.vip

Verdict

0

OUT OF 100

CRITICAL RISK

33033.vip shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short page displaying a security/redirect notice and immediately pointing to 33033.vip. No product, contact, or verification info; likely a traffic redirect/gate with potential misuse risk.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	4.4 years old Registered history	CLEAR
Web archive	Archived since 2023 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE2	NOTED

The page as captured

<https://33033.vip/>

What 33033.vip served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents a minimal “Security” notice that redirects visitors to 33033.vip, functioning as a lightweight interstitial or traffic gate rather than a transparent operating website with an identifiable service, product, or business purpose.

Scam/Impersonation Risk

Confirmed contradictions are present. The site is blacklisted, and multiple independent security providers classify it as malicious; this materially outweighs the absence of a login form or observed credential-capture mechanism. The homepage's immediate external forwarding, extremely limited content, suspicious inline scripts, and lack of an explainable value flow are consistent with a redirect mechanism that could be used for traffic abuse or unsafe onward navigation. No separate legal-entity identity contradiction or confirmed brand impersonation was observed, but the available evidence supports treating sensitive interaction as unsafe.

EVIDENCE

- Homepage: displays only “Security” and a notice redirecting visitors to 33033.vip, with no product, operator, terms, or contact information.
- External reputation checks: 14 malicious detections were recorded, including detections from Fortinet, Kaspersky, and Sophos; confirmed blacklist status is also present.
- Browser behavior: 2 suspicious inline scripts, 2 console errors, and immediate external-link forwarding were observed during testing.
- Domain registration: Registered 2022-03-14 and approximately 4.44 years old, through Dynadot LLC.

Regulatory Verification Notes

The site does not provide a substantive legal or regulated-service disclosure from which an operator, business activity, licensing basis, or responsible jurisdiction can be assessed. This is a significant transparency gap for any site that might direct traffic toward financial, commercial, or other sensitive services, although the absence of a license statement alone is not treated as proof of fraud. A separate broker-reputation dataset produced no match; that is contextual only and does not establish licensing or regulatory status. Identity verification remains unconfirmed.

EVIDENCE

- Homepage: contains no company name, licensing statement, registration number, terms, privacy notice, or contact details.
- Domain registration record: Registrar is Dynadot LLC; registrant organization is listed as Super Privacy Service LTD c/o Dynadot.
- Transport encryption: TLS certificate issued by YE2, validation level DV, valid to 2026-11-13.

What to Verify Next

Any prospective engagement should first identify the final service operator independently and confirm any claimed authorization with the relevant official registry, rather than relying on the redirect page. The destination and its payment, credential, and support channels should be validated through an independently obtained contact route; absent those checks, login, credential submission, financial transactions, and downloads should not proceed.

EVIDENCE

- Homepage: provides no operator or service information capable of supporting an independent identity or authorization check.
- Redirect behavior: forwards visitors externally before presenting substantive business, security, or transaction details.

Summary Verdict

The site carries a critical trust posture and should be treated as unsuitable for sensitive interaction. Its apparent function, content quality, and external threat reputation do not provide a defensible basis for treating it as a legitimate service gateway.

Infrastructure Integrity

The site resolves without a detected CDN or WAF, with the observed hosting infrastructure associated with ANTI-DDOS - NetLab Global, US and direct origin candidates rather than a protected edge layer. This infrastructure may provide network-level mitigation, but it does not establish legitimacy and does not offset the site's external reputation risk.

EVIDENCE

- Hosting infrastructure: Served from AS35251 (ANTI-DDOS - NetLab Global, US), with server IP 45.138.71.205 in HK.
- Network posture: 9 unique IP addresses were identified; 0 were classified as edge IPs and 9 as likely origin candidates.

Closing Assessment

The appropriate enterprise disposition is to block or isolate the site and prevent sensitive interaction, while investigating any referral or campaign that led users to it. Any necessary examination should be performed through controlled security tooling without following the redirect in a normal user session.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 33033.vip.

- The request stayed on 33033.vip. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by xundns.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-14. CLEAR
- The earliest public archive of this site is from 2023-11-01. CLEAR
- It is hosted on ANTI-DDOS, from a server in HK. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 33033.vip at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
