

Is 356007.com a scam? TrustSniffer's high-risk assessment: 0/100

356007.com

Verdict

0

OUT OF 100

CRITICAL RISK

356007.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short Chinese-language promotional landing page with repetitive CTAs claiming long-standing official brand reputation. Lacks product details, contact information, or verifiable credentials — likely a clickthrough/affiliate landing.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://356007.com/>

What 356007.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a very short Chinese-language promotional landing page that presents “click to enter” calls to action, “official direct sales” messaging, and a claim of a 20-year reputable brand, apparently directing visitors toward an off-site storefront, offer, referral, or lead-capture flow rather than explaining a clearly identified business or product.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. Confirmed blacklist status and malicious detections from external security intelligence materially outweigh the presence of ordinary transport and hosting controls. The page’s credibility claims are not supported by corresponding company details, product information, contact channels, or verifiable credentials, creating a clear claim-to-evidence gap. Observed behavior also included non-whitelisted external requests and posts, consistent with a click-through page whose destination and data-handling purpose are not transparent. No separate conflicting legal-entity names or direct brand-impersonation finding were observed, but the blacklist evidence is sufficient for a clearly cautionary assessment.

EVIDENCE

- External reputation evidence records a confirmed blacklist hit, with 16 malicious detections among 21 effective detections and a threat finding from two major security vendors.
- The homepage contains only 34 characters of substantive text, including “请点击进入” (“click to enter”) and “官方直营20年信誉品牌” (“official direct sales, 20-year reputable brand”), without supporting evidence.
- The site’s historical records contain 50 archive snapshots, first seen 2018-08-04 and last seen 2026-03-06, spanning 9 years tracked.
- Registration telemetry records creation on 2025-09-11 and an age of 0.94 years.

Regulatory Verification Notes

The available page does not identify a legal operator, licensing authority, or license number, and the business purpose is not sufficiently described to determine which regulatory regime would apply. This is a material transparency and verification gap rather than, by itself, proof of misconduct; however, in combination with the confirmed blacklist signal and unsupported promotional claims, it prevents the site from being treated as a verified commercial or regulated service. The available identity evidence remains insufficient to independently connect the page to a real-world entity.

EVIDENCE

- The homepage is classified as a landing/click-through page and provides no clear product, pricing, corporate, or credential disclosure.
- The domain is registered through Domainipr Limited.
- The site is served via AS13335, Cloudflare, Inc., US.
- Transport encryption is provided by a DV TLS certificate issued by WE1, valid to 2026-10-03.

What to Verify Next

Sensitive interaction should be suspended unless an independent investigation identifies the responsible legal entity, confirms any required authorization with the relevant official registry, and validates the destination behind the call-to-action through an offline or independently sourced channel. No credentials, financial information, payment, or account activity should be submitted while those checks remain unresolved.

EVIDENCE

- Identity verification is recorded as unverified, with no independent identity signals supplied.
- The page’s stated commercial proposition is not sufficiently specified to establish the applicable licensing or consumer-protection requirements.

Summary Verdict

The site has a critical risk posture and should not be treated as a trustworthy destination for sensitive interaction. The available evidence indicates a poorly substantiated promotional presence combined with confirmed external threat and blacklist signals; its apparent legitimacy and operator identity are not established.

Infrastructure Integrity

Cloudflare CDN/WAF protection and routing through observed Cloudflare edge infrastructure provide a mitigating layer against direct exposure, but this protective hosting arrangement is not evidence of site legitimacy and cannot offset the external reputation findings.

Closing Assessment

Enterprise users should block or isolate the site pending independent identity, authorization, destination, and security validation; any engagement should be limited to controlled investigation rather than ordinary account, credential, payment, or financial activity.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 356007.com.

- The request stayed on 356007.com. It was not redirected to another domain. CLEAR
- Registration is published under Domainipr Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-11. NOTED
- The earliest public archive of this site is from 2018-08-04. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 356007.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
