

Is 3656ee.com a scam? TrustSniffer's high-risk assessment: 0/100

3656ee.com

Verdict

0

OUT OF 100

CRITICAL RISK

3656ee.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 404 Not Found page served by nginx containing a short Chinese header line and no links, forms, or business information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

403 Forbidden

openresty/1.25.3.2

What 3656ee.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

3656ee.com currently presents a minimal error page rather than an identifiable service: visitors see a short Chinese header, "404 Not Found," and an nginx response, with no visible business model, service flow, or contact pathway.

Scam/Impersonation Risk

The principal risk is external rather than a visible on-page impersonation mechanism. Independent threat-intelligence detections identify the domain as malicious and blacklisted, with corroboration from multiple sources; this materially outweighs the absence of login forms, wallet functionality, or other active transaction elements on the captured page. The homepage is effectively inert, so it does not establish whether the current response represents the site's intended service or a changed endpoint. No page-level brand impersonation or phishing form was observed, but the confirmed blacklist status is sufficient to treat sensitive interaction as inappropriate.

EVIDENCE

- Homepage: returns an HTTP 404 page containing the Chinese header “凯发-感恩有你,一路同行,” with no links, forms, or business information.
- External reputation telemetry: 16 malicious detections and 1 suspicious detection were recorded, including detections from Kaspersky and Sophos; the domain is also identified as blacklisted.
- Browser behavior: 2 external XHR requests and 2 external POST requests were observed, all classified as non-whitelisted; no hidden forms, password forms, wallet connections, or clipboard activity were detected.

Regulatory Verification Notes

The site's captured content provides no stated license, registration number, operator identity, or governance information, leaving its real-world identity unverified and its disclosure position unclear. This is a regulatory and transparency gap rather than a standalone finding of fraud, but it is significant in combination with the confirmed external threat detections. No match was found in the available broker-reputation dataset; that absence is contextual only and does not establish licensing or legitimacy. The registration record identifies Spaceship, Inc. as registrar. Historical capture data records activity from 2019-08-18 through 2026-06-11 across 8 years, while the current registration record dates from 2024-12-04; those provenance records should not be treated as proof of a continuous current operator.

EVIDENCE

- Registration record: created 2024-12-04T03:44:21Z, approximately 1.71 years old, expiring 2027-12-04T03:44:21Z; registrar is Spaceship, Inc.
- Archive record: 0 recorded snapshots, first seen 2019-08-18T23:14:04Z, last seen 2026-06-11T18:48:04Z, with 8 years tracked.
- Hosting telemetry: served from AS13335, Cloudflare, Inc., US.
- Transport security: TLS certificate issued by WE1 using DV validation, valid until 2026-10-05T21:35:17+00:00.

What to Verify Next

Before any sensitive engagement, an institution should confirm the intended domain through an independently obtained official source, identify the operating legal entity through authoritative corporate records, and confirm any claimed financial or other regulated activity directly with the relevant regulator. Contact channels should be validated through an independent, offline route rather than relying solely on information presented by the site. No credentials, payment details, or financial transfers should be submitted unless those checks produce a consistent and independently supported identity.

EVIDENCE

- The homepage provides no usable business, legal, service, or contact information from which operator verification can be completed.
- The captured site does not state a license authority or license number.
- The available identity-verification status is unverified, so on-site presentation cannot independently establish the responsible operator.

Summary Verdict

The website has a critical trust posture and presents unacceptable risk for sensitive interaction. Its current content is insufficient to establish a legitimate operating purpose, while confirmed external malicious and blacklist signals create a material basis for treating the domain as potentially harmful.

Infrastructure Integrity

Cloudflare CDN/WAF infrastructure provides a mitigating layer for network exposure, with observed edge service on AS13335 and no origin server candidate visible in the analysis. This protective infrastructure supports delivery resilience but does not validate the site's operator or offset the external threat detections.

Closing Assessment

Prospective users and institutions should restrict activity to passive observation, avoid account, credential, payment, and financial interactions, and pursue independent domain and operator validation before considering any engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3656ee.com.

- The request stayed on 3656ee.com. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-12-04. CLEAR
- The earliest public archive of this site is from 2019-08-18. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3656ee.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
