

Is 3656zz.com a scam? TrustSniffer's high-risk assessment: 0/100

3656zz.com

Verdict

0

OUT OF 100

CRITICAL RISK

3656zz.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 404 Not Found page served by nginx with a short Chinese tagline and no interactive elements.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	17 flagged it VirusTotal	RISK

What 3656zz.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

3656zz.com currently presents a minimal error page rather than an identifiable service: the homepage displays a short Chinese tagline, "404 Not Found," and an nginx server notice, with no visible business model, interactive functionality, or stated purpose.

Scam/Impersonation Risk

A confirmed **blacklist** contradiction materially elevates the risk of interacting with this domain. External reputation telemetry recorded 17 malicious detections and one suspicious detection, including flags from Kaspersky and Sophos; this is substantially more concerning than the benign appearance of the captured page. The homepage itself contains no login form, sensitive form, phishing interface, or evident brand impersonation, but its absence of functionality does not resolve the external threat findings. The domain is not presently suitable for credential, account, or financial interaction. Evidence:

- External reputation assessment: 17 malicious detections and 1 suspicious detection were recorded for the domain; Kaspersky and Sophos were among the flagged vendors.
- Homepage: the captured response is an nginx “404 Not Found” page with no forms, login workflow, or interactive elements.
- Domain registration record: registered 2024-12-09; approximately 1.7 years old.

Regulatory Verification Notes

The captured site provides no visible legal, corporate, licensing, or regulated-service disclosure because the homepage is only an error response. The real-world operator therefore remains unverified, and the available presentation does not establish who is responsible for the domain or what activity it is intended to support. This is a transparency and verification gap rather than an independent finding of unlawful operation; however, it prevents reliable regulatory or commercial due diligence from being completed from the site itself. Evidence:

- Homepage: no company identity, terms, privacy notice, license statement, registration number, or regulated-service description is visible.
- Hosting telemetry: served from AS13335, operated by CLOUDFLARENET—Cloudflare, Inc., US.
- Transport security: TLS certificate issued by WE1 with DV validation, valid to 2026-09-30.

What to Verify Next

Before any sensitive interaction, an independent review should identify the legal entity behind the domain and match any claimed authorization against the relevant official registry. The domain should also be checked through an independently sourced contact or organizational channel, and any future page offering login, downloads, payments, or account functions should undergo a fresh security review rather than being treated as a continuation of the current error page. Evidence:

- Official regulatory registry: confirm the operator name, jurisdiction, authorization scope, and current status independently of the website.
- Independent contact validation: confirm official support and organizational channels through a separately sourced route before sharing information.
- Fresh endpoint review: reassess the domain if its content changes from the current 404 response to an interactive or transactional service.

Summary Verdict

The overall posture is **critical risk**, with the domain unsuitable for sensitive interaction. Its identity is unverified, and the available evidence does not provide a defensible basis for treating it as a trusted endpoint.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses are CDN edge infrastructure rather than a directly exposed origin. This reduces direct origin exposure but is only a mitigating infrastructure characteristic; it does not offset the domain’s external reputation risk or establish legitimacy.

Closing Assessment

Prospective users should restrict activity to non-interactive observation and refrain from login, credential submission, downloads, or financial transactions unless independent checks produce a documented basis for trust.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3656zz.com.

- The request stayed on 3656zz.com. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-12-09. CLEAR
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3656zz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
