

Is 365905.bet safe? TrustSniffer's moderate-trust assessment: 65/100

365905.bet

Verdict

65

OUT OF 100

MODERATE TRUST

365905.bet is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A Chinese-language corporate website for a coatings/advanced materials company (中航百慕新材料/中航新材). It contains company introduction, product categories (primers, intermediate coats, topcoats), industry solutions, engineering cases, news and contact details. Some unrelated gambling-style external links appear in a '友情链接'/footer area, which is a suspicious artifact but the primary site content is corporate and informational.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Chinese-language corporate and informational website presenting a coatings and advanced-materials business, with product categories, industrial solutions, engineering cases, company news, qualifications, and contact information; its apparent business model is B2B sales of protective coatings and related technical or engineering services.

Scam/Impersonation Risk

No confirmed phishing, impersonation, blacklist, malicious-content, or identity-conflict indicators were observed. The principal anomaly is that the otherwise corporate homepage and footer contain unrelated gambling-style outbound references, including casino, lottery, and betting terminology. This is inconsistent with the stated coatings business and may indicate compromised or injected page content, although the available evidence does not establish that gambling is part of the site's core offering. Dynamic testing also observed non-whitelisted

external requests and posts, together with substantial browser-console errors, so sensitive interactions should not be treated as risk-free solely because the visible site is corporate in appearance.

EVIDENCE

- The homepage presents primers, intermediate coats, topcoats, industrial solutions, engineering cases, and corporate news, with no gambling product described as part of the business.
- The homepage/footer contains unrelated gambling-style external references under the “友情链接” area, including casino, lottery, and betting-related terms.
- The domain registration record states creation on 2026-06-22 and an age of approximately 0.16 years.
- Historical records contain 8 snapshots spanning 2021–2026, representing 6 years tracked; no suspicious repurposing or semantic category change was identified.

Regulatory Verification Notes

The legal and corporate content presents the operator as 中航百慕新材料工程股份有限公司, also referred to as 中航新材, and claims establishment in 1996, registered capital of RMB 109.15 million, high-technology-enterprise status, and a 2009 listing on China’s National Equities Exchange and Quotations under code 430056. These are substantive on-site identity claims, but the operator’s real-world identity remains independently unverified in the available evidence. The reviewed pages do not provide a clearly independently verifiable licensing or registration reference for the specific online domain; this is a transparency item for validation rather than evidence of a scam. External reputation checks did not identify malicious or suspicious findings, although coverage was partial.

EVIDENCE

- The company-introduction page states the corporate name, 1996 establishment date, registered capital, claimed qualifications, and claimed 2009 quotation-system listing.
- The product and solutions pages describe primers, intermediate coats, topcoats, and applications across bridge, marine, power, petrochemical, rail, drinking-water, and aerospace-support industries.
- The site is hosted on AS137951, ASLINE-AS-AP (ASLINE LIMITED, HK).
- Transport encryption uses a DV certificate issued by YR2, valid to 2026-09-20.

What to Verify Next

Before a high-value procurement, commercial engagement, or disclosure of sensitive business information, an independent corporate-registry search should confirm the company name, claimed quotation code, registered address, and authorized representatives. Any required manufacturing, environmental, defense-related, or project-specific qualifications should be checked with the relevant Chinese authority or contracting body rather than accepted solely from the website. Contact details and payment instructions should be confirmed through an independently sourced corporate channel, and procurement should use contractual protections, verified beneficiary details, and payment-recovery safeguards.

EVIDENCE

- The company-introduction and qualifications pages provide the identity claims that should be matched against authoritative corporate records.
- The solutions and engineering-case pages identify the sectors and project types relevant to any proposed engagement.
- The contact page supplies the communication details that should be cross-checked through an independent route before contracting.

Summary Verdict

The website has a **moderate trust posture**: its substantial corporate content and coherent B2B manufacturing presentation support an apparently legitimate business purpose, while independent operator verification and the unexplained gambling-related footer content prevent a high-confidence conclusion. No active scam or impersonation contradiction was observed.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than through a detected CDN or WAF edge layer. This provides limited infrastructure obfuscation or protective separation, although the confirmed TLS deployment offers basic transport protection; infrastructure characteristics alone do not establish legitimacy.

Closing Assessment

Ordinary informational review is proportionate, while sensitive disclosures, binding commitments, and high-value payments should proceed only after the independent corporate and counterparty checks described above are complete.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- The page sent data to a destination TrustSniffer does not recognise.
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 365905.bet.

- The request stayed on 365905.bet. It was not redirected to another domain. CLEAR
- Registration is published under GNAME.COM PTE. LTD.. CLEAR
- DNS for this domain is served by share-dns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-22. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on ASLINE-AS-AP, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 365905.bet at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
