

Is 365k22.cc a scam? TrustSniffer's high-risk assessment: 0/100

365k22.cc

Verdict

0

OUT OF 100

CRITICAL RISK

365k22.cc shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Short Chinese-language verification/security checkpoint text: shows progress '加载中 79.0%', references '通过360安全检测' and brief trust phrases. No links, forms, or monetization visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://365k22.cc/k8.html>

What 365k22.cc served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents a short Chinese-language verification and security checkpoint rather than a conventional commercial or financial-service site. Visitors see a loading indicator, a reference to a 360 security check, and brief reassurance text, but no identifiable product, transaction flow, business description, or visible contact and legal navigation.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture**. No identity contradiction or brand impersonation was observed in the captured page, and the page itself contains no login form, payment form, or visible monetization flow. However, the domain is blacklisted by external sources, with malicious detections from multiple security providers; this is a confirmed contradiction that outweighs the otherwise limited page-level content findings. The absence of visible phishing mechanics in the capture does not neutralize the external threat evidence, particularly because the page is only a transitional checkpoint and may not expose the complete interaction surface.

EVIDENCE

- External reputation assessment recorded 16 malicious detections and 1 suspicious detection for the domain.
- The domain was recorded as blacklisted by two external sources; a broader search-reputation check returned no malicious result.
- The captured interstitial contains 38 characters of Chinese-language text, no links, no forms, and no visible transaction mechanism.
- WHOIS records show registration on 2024-06-25, with a recorded domain age of approximately 2.15 years; archive records contain 12 snapshots spanning 2021–2025, covering 5 years.

Regulatory Verification Notes

The available material does not establish the real-world operator, legal entity, regulated status, or licensing basis of the website. The captured content is limited to a security checkpoint and provides no visible license number, licensing authority, corporate identity, terms, or privacy disclosure. This is a material verification gap for any service that might later request credentials, funds, or other sensitive information. The registrar is Spaceship, Inc.; that registration fact does not independently verify the operator. The absence of a broker-dataset match provides no regulatory conclusion either way.

EVIDENCE

- The captured page provides no visible corporate, legal, licensing, terms, or privacy disclosures.
- The domain is registered through Spaceship, Inc., with a recorded expiry date of 2027-06-25.
- The site is served from AS13335, operated by CLOUDFLARENET – Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses Domain Validation (DV), and is valid through 2026-11-06.

What to Verify Next

Any claimed operator should be matched to an independently sourced corporate record and, where relevant, confirmed through the applicable financial-services regulator before sensitive engagement. Any licensing assertion should be checked directly against the regulator's current register using independently obtained details rather than information supplied only by the site. Contact channels and any eventual destination reached after the checkpoint should be confirmed through an offline or independently published route. Until those checks are complete, interaction should remain limited to passive observation and controlled technical analysis.

EVIDENCE

- The site's captured content is an interstitial rather than an identifiable service or legal-information page.
- No independent operator, licensing, or contact information is presented in the available capture.
- Behavioral analysis recorded two external XMLHttpRequests and two external POST requests, all classified as non-whitelisted, with a maximum external activity proportion of 60%.
- The captured behavior showed no password form, hidden form, wallet connection, clipboard write, or wallet-drainer activity.

Summary Verdict

The website's overall posture is critical and unsuitable for sensitive interaction. Available evidence does not independently verify the operator, while confirmed external threat and blacklist signals create a substantial basis for treating the site as unsafe for credentials, financial activity, or other high-impact actions.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the hosting environment, but they are shared protective infrastructure and do not establish legitimacy. All observed addresses were Cloudflare edge addresses, with no origin candidate identified in the analysis.

Closing Assessment

Sensitive interaction should not proceed; any necessary investigation should be conducted through isolated, read-only methods until the operator, destination behavior, and applicable authorization have been independently established.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 365k22.cc.

- The request stayed on 365k22.cc. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-25. NOTED
- The earliest public archive of this site is from 2021-11-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 365k22.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
