

Is 3dexperts.me legit? TrustSniffer's high-trust assessment: 100/100

3dexperts.me

Verdict

100

OUT OF 100

HIGH TRUST

3dexperts.me appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for 3DExperts.me offering 3D scanning, BIM, heritage digitization and 3D printing services. Includes credentials, case studies, region of operation, contact info and an instant quote feature. Appears to be a legitimate regional services business.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

3DExperts.me is a corporate services website presenting Adriatic-based 3D scanning, BIM and engineering, heritage digitization, 3D printing, product development, and aerial surveying services, with case studies, credentials, regional coverage, and quote or consultation requests for commercial projects.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent professional-services model rather than a financial, investment, or credential-harvesting operation; the homepage and service pages describe engineering deliverables, project quotes, and client work. There are no detected phishing, impersonation, blacklist, or other page-level red flags, and observed interaction testing found no login form, hidden sensitive form, wallet connection, clipboard manipulation, or suspicious script behavior.

EVIDENCE

- The homepage and service content identify 3D scanning, BIM, heritage digitization, 3D printing, CAD, product development, and drone or LiDAR services.
- The homepage and contact workflow provide quote and consultation functions without a sensitive-data form or untrusted submission destination.
- Behavioral testing recorded 2 successful runs, 0 hidden forms, 0 password-external forms, 0 wallet-provider detections, and 0 suspicious inline scripts.
- Domain registration: 2022-07-21 (~4.09 years old); archival continuity records 10 snapshots spanning 2020–2023, with 4 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an established regional engineering and manufacturing-services business, not a site offering a regulated financial product. The website cites buildingSMART membership, ISME TK019 BIM standardization involvement, a Ministry of Montenegro BIM Working Group reference, a CAS ETH Zürich digitalization certificate, GDU Technology authorization, and an Artec 3D heritage partnership; these are on-site claims and do not independently verify the operator or the stated affiliations. The legal and identity pages include About Us, Terms, Privacy, and Impressum sections, but the real-world operator identity remains independently unverified and the available disclosure does not establish a licensing or registration position. A local broker-reputation dataset produced no match, which is a contextual reputational signal rather than a regulatory determination.

EVIDENCE

- The homepage identifies the business as “Adriatic 3D Engineering, BIM & Heritage Digitization” and states coverage across the Adria region, the EU, and worldwide.
- The About Us, Terms, Privacy, and Impressum pages are available as distinct internal pages.
- The domain registrar is Ascio Technologies, Inc. Danmark - Filial af Ascio technologies, Inc. USA; domain expiry is 2027-07-21T06:43:04Z.
- No regulated financial offering or financial-services license claim appears in the supplied site content.

What to Verify Next

Before a credential or payment interaction, the prospective customer should confirm the contracting legal entity, invoice details, service terms, cancellation or remedy provisions, and payment-protection arrangements through the site's legal and contact pages. Claimed memberships, certifications, authorizations, and partnerships should be independently confirmed with the named organizations, and any sector-specific registration should be checked with the relevant jurisdictional registry if the proposed work requires one.

EVIDENCE

- The site provides an Impressum, Terms, Privacy, About Us, Contact, FAQ, and Get a Quote page for independent document review.
- The homepage lists named credentials and partnerships that can be cross-checked with the respective organizations.
- The quote workflow is described as project-based, supporting confirmation of scope, deliverables, invoicing, and payment conditions before engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture and no observed scam or impersonation contradictions. The classification supports ordinary business interaction, while the operator’s real-world identity should remain treated as unverified rather than proven.

Infrastructure Integrity

The website is served through Cloudflare’s CDN and WAF, which is a mitigating infrastructure control that reduces direct exposure of the underlying service environment but does not itself establish business legitimacy. All observed addresses were Cloudflare edge addresses, and no origin candidate was observed.

EVIDENCE

- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US); observed edge addresses: 104.21.84.208, 172.67.197.35, 2606:4700:3033::ac43:c523, and 2606:4700:3037::6815:54d0.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-30T22:35:00+00:00.
- Infrastructure resolution identified 4 unique IP addresses, all 4 as CDN edges, with 0 likely origin addresses.

Closing Assessment

Engagement is proportionate for a conventional professional-services transaction, provided the contracting details, commercial terms, and payment protections are confirmed independently before material commitments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3dexperts.me.

- The request stayed on 3dexperts.me. It was not redirected to another domain. CLEAR
- Registration is published under Ascio Technologies, Inc. Danmark - Filial af Ascio technologies, Inc. USA. CLEAR
- The registration is paid up to 2027-07-21. NOTED
- The earliest public archive of this site is from 2020-11-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3dexperts.me at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
