

Is 3med.net safe? TrustSniffer's low-trust assessment: 40/100

3med.net

Verdict

40

OUT OF 100

LOW TRUST

3med.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Bulgarian-language corporate site for 3 MED EOOD, a medical products representative, importer and distributor established in 1998. Provides product categories, partner information and contact details (phone, fax, email, physical address).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://3med.net/

What 3med.net served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

3med.net is a Bulgarian-language corporate and e-commerce website presenting 3 MED as a representative, importer, and distributor of medical and veterinary products, including testing kits, infusion-therapy products, and drug-testing products, with an apparent business model based on wholesale, retail, and distribution services.

Scam/Impersonation Risk

A confirmed blacklist record creates a material contradiction to the otherwise conventional medical-distribution presentation and warrants a security-forward posture for sensitive interactions. Additional external detections are present, although the site itself shows no login form, hidden sensitive form, wallet connection, suspicious script, or overt financial-promise language. A separate domain-similarity signal associates the site with “me.com”; this is not independently corroborated by the site's medical-products content and is not treated as proof of impersonation. The site's identity remains unverified independently, despite its stated corporate profile.

EVIDENCE

- The external reputation assessment records the domain as blacklisted and reports one malicious and two suspicious detections.
- The homepage presents 3 MED as a Bulgarian medical-products distributor and lists product categories including testing kits and infusion therapy.
- Domain registration: 2003-05-30; age 23.24 years; registrar PDR Ltd. d/b/a PublicDomainRegistry.com.
- Web-archive coverage: 77 snapshots spanning 2003–2026, representing 24 years tracked.

Regulatory Verification Notes

The About and homepage content describes a company established in 1998 and claims completed contracts with Bulgaria's Ministry of Defence, Ministry of Health, Ministry of Interior, and hospital networks. Those claims are not independently established by the supplied evidence. The pages do not present a licensing authority or license number, so regulatory eligibility for the medical-product activities remains a transparency and verification matter rather than proof of unlawful conduct. The site's transport security is technically valid, but that infrastructure fact does not establish the operator's identity or regulatory standing.

EVIDENCE

- The About/homepage content describes 3 MED's activities as representation, import, and distribution of medical products and identifies hospitals, pharmacies, wholesalers, and sub-distributors as counterparties.
- The supplied pages contain no stated licensing authority or license number.
- The site is served from AS49699, ICN-BG - SuperHosting.BG Ltd., BG.
- TLS is issued by YR2 at DV validation level and is valid to 2026-11-04.

What to Verify Next

Before any commercial engagement, an institution should independently confirm the company's legal registration and authority to import or distribute the relevant medical and veterinary products through the applicable Bulgarian registries. The claimed public-sector and hospital relationships should be validated through independently sourced institutional contacts, and the physical business details should be checked through an offline or separately obtained contact route. Any purchase should use payment protections, documented invoicing, and contractual return and product-traceability terms.

EVIDENCE

- The homepage and About content make specific claims concerning establishment in 1998 and completed government and hospital contracts.
- The Products and electronic-shop areas indicate a commercial supply relationship requiring product, supplier, and transaction validation.
- The Contacts page provides telephone, fax, email, and a Sofia postal address suitable for independent cross-checking.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site's ordinary corporate presentation and absence of overt malicious page behavior do not offset the confirmed external reputation contradiction, and the real-world operator has not been independently verified.

Infrastructure Integrity

The site resolves directly to hosting operated by SuperHosting.BG in Bulgaria, with no detected CDN or WAF layer and a visible hosting endpoint. This provides a clear technical hosting path but offers no independent assurance of legitimacy.

Closing Assessment

Prospective users should restrict activity to non-sensitive review until the operator, regulatory standing, and transaction safeguards have been independently confirmed; credentials, payments, and other sensitive actions should not be undertaken on the basis of the site's presentation alone.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 3med.net.

- The request stayed on 3med.net. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by icndns.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-30. NOTED
- The earliest public archive of this site is from 2003-12-16. CLEAR
- It is hosted on ICN-BG, from a server in BG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3med.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
