Full analysis

Overview

The website is an informational community site for 3rd Streetsville Scouting, presenting Scouts Canada activities in Streetsville, Mississauga, including Beavers, Cubs, Scouts, and Venturers, together with outdoor programs, uniforms, badges, history, joining information, and contact details. Its apparent purpose is to support local youth scouting participation rather than provide a commercial or financial service.

Scam/Impersonation Risk

The site's visible content is consistent with a local scouting group and contains no detected brand-impersonation or phishing indicators in the reviewed pages. However, this benign presentation is materially contradicted by external threat intelligence: the domain has two malicious detections and a confirmed blacklist listing. Interactive testing also detected hidden forms on both observed runs, although no password-external forms, wallet activity, or sensitive-form submission was identified. The combination warrants a clearly cautionary posture for credentials, account access, donations, or other sensitive interactions, even though the site's apparent community purpose is not itself suspicious.

EVIDENCE

- The homepage presents 3rd Streetsville Scouting, Scouts Canada programming, outdoor activities, and local facilities rather than a commercial or financial offer.
- Interactive testing detected hidden forms during 2 of 2 runs; 0 password-external forms and 0 wallet-related runs were observed.
- External threat intelligence recorded 2 malicious detections and a confirmed blacklist listing for the domain.
- Domain registration records show creation on 2018-06-10, making the domain approximately 8.2 years old; historical coverage spans 2021-11-23 to 2025-07-30 across 5 years and is sparse.

Regulatory Verification Notes

The reviewed pages describe a local community organization and include program, history, joining, and contact content, but they do not present a licensing claim or regulatory registration number. That is broadly consistent with the site's stated informational and community purpose, but it does not independently establish the operator's real-world identity or authority to collect funds. The registration record names "3rd Streetsville Scouting," while identity verification remains only likely rather than independently confirmed. A valid domain certificate and identifiable registrar are positive technical and administrative signals, but they do not offset the external reputation contradiction.

EVIDENCE

- The site's navigation includes Join, Contact, About, and History pages; no licensing or regulatory registration disclosure is presented in the supplied page content.
- The domain registrar is Go Daddy Domains Canada, Inc.; the registration record lists "3rd Streetsville Scouting" as the owner.
- TLS is issued by YR1 at DV validation level and is valid through 2026-10-22T08:29:37+00:00.

What to Verify Next

Before any sensitive interaction, the site's group name and contact details should be confirmed through an independently obtained Scouts Canada channel rather than relying solely on links or contact information presented on the site. Any donation or payment request should be matched to an independently confirmed beneficiary and processed through a payment method offering appropriate dispute protection. The contact page, joining instructions, and linked social presence should also be checked for consistency before credentials or personal information are submitted.

EVIDENCE

- The homepage links to Facebook as an activity and group-information channel.
- The site provides dedicated Join and Contact paths that can be compared against independently sourced organizational details.
- The reviewed forms analysis found no login form and no sensitive form, but hidden forms were detected during interactive testing.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's apparent community purpose and coherent page content do not overcome the confirmed external threat contradiction, and the real-world operator connection remains unverified. Ordinary browsing of publicly available information is materially different from trusting the site with credentials, personal data, donations, or other sensitive transactions.

Infrastructure Integrity

The site resolves directly to a single likely origin address, with no detected CDN or WAF layer. It is hosted by Oracle Corporation in the United States on AS31898; this provides an identifiable hosting environment but limited protective mediation, and hosting infrastructure is not evidence of legitimacy.

Closing Assessment

Sensitive interactions should remain paused until the organization and its contact and payment channels have been independently confirmed through an authoritative offline or separately sourced route.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 3rdstreetsville.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
