What 4daysgroup.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2005.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

4DAYS GROUP TECH is a French-speaking digital agency presenting web development, hosting, mobile application, ERP, branding, social-media management, and AI/data services, with an apparent business model based on client projects, managed services, and hosting subscriptions.

Scam/Impersonation Risk

A confirmed blacklist hit and multiple external malicious detections create a material contradiction to the site's otherwise conventional corporate presentation. The available evidence does not identify an identity contradiction, brand impersonation, or phishing login mechanism, and the site's pages contain no credential-harvesting form; nevertheless, the external reputation signals are sufficiently serious that the site should be treated as unsuitable for sensitive interaction until independently cleared. The published agency content may be genuine, but it does not neutralize the confirmed reputation risk.

EVIDENCE

- External reputation assessment recorded 4 malicious and 1 suspicious detections, with a confirmed blacklist result across two external sources.
- The homepage presents a corporate digital-agency profile, while behavioral testing recorded no login form, hidden sensitive form, wallet connection, clipboard hijacking, or external password form.
- The domain was registered on 2016-12-30 and is recorded as approximately 9.64 years old.

Regulatory Verification Notes

The About and Contacts content identifies 4DAYS GROUP TECH and presents service and location information for France, Senegal, and Guinea, but the available evidence does not independently verify the real-world operator. No license, registration number, or regulated-service authorization is claimed in the supplied site content. This is a disclosure and verification gap rather than, by itself, proof of misconduct. The site's administrative and transport signals are technically coherent, but they do not override the external reputation contradiction.

EVIDENCE

- The homepage and About page identify 4DAYS GROUP TECH as the service provider and describe its corporate offerings.
- The domain registration lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar.
- Hosting is provided by O2SWITCH - O2SWITCH SAS, France, on AS50474.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-10-14.

What to Verify Next

Before any business engagement, an independent check should confirm the operator's legal registration and any sector-specific authorization applicable to the proposed service. Contact details should be validated through an independently sourced channel rather than relying solely on the website. Sensitive credentials, confidential business data, and financial transactions should remain withheld unless the external detections are resolved and the counterparty is independently confirmed.

EVIDENCE

- Confirm the named operator and corporate registration through the relevant French, Senegalese, or Guinean official registry, according to the contracting entity.
- Obtain written contractual terms identifying the legal counterparty, payment recipient, service scope, and dispute process.
- Validate official contact channels through an offline or independently sourced business record.
- Require an explanation and documented remediation for the confirmed external reputation detections before permitting sensitive interaction.

Summary Verdict

The overall posture is **critical trust risk**, driven primarily by confirmed external threat and blacklist signals rather than by the site's stated digital-agency business model. The website may represent a real agency, but its

legitimacy is not sufficiently established for sensitive interaction, and the available evidence does not support treating it as trusted.

Infrastructure Integrity

The site resolves directly to O2SWITCH hosting infrastructure, with no CDN or WAF layer identified and a likely origin address exposed. This provides limited infrastructure-based mitigation; the hosting arrangement is a technical fact, not evidence of legitimacy.

EVIDENCE

- One resolved address was recorded: 109.234.162.81, with 1 unique IP and 1 likely origin IP.
- No CDN edge IPs or detected CDN vendors were present in the hosting assessment.

Closing Assessment

Restrict activity to passive review until independent identity, authorization, contact, and reputation checks are completed; account access, credential submission, confidential-data exchange, and financial dealings should not proceed in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 4daysgroup.com.

- The request stayed on 4daysgroup.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by o2switch.net, across 2 name servers. NOTED
- The registration is paid up to 2026-12-30. NOTED
- The earliest public archive of this site is from 2005-02-20. CLEAR
- It is hosted on O2SWITCH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 4daysgroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
