What 4healthykids.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a direct-to-consumer ecommerce store presenting pediatric herbal remedies and natural healthcare products under the names Dr. Sergei Shushunov and Lev Laboratories, with product information, prices, cart functionality, contact facilities, and policies intended to support online sales.

Scam/Impersonation Risk

A **confirmed blacklist signal** creates a material risk for sensitive interaction, despite the absence of detected brand impersonation, phishing behavior, or conflicting legal identities in the supplied page analysis. The site's long registration history and historical continuity are positive contextual signals, but they do not neutralize the external reputation finding. The available evidence therefore supports a clearly cautionary posture for account, payment, and other sensitive activity.

EVIDENCE

- The domain was registered on 2002-09-10 and is recorded as 23.96 years old.
- Historical archive coverage spans 25 years, from 2002-09-21 through 2026-06-09.
- External reputation checks recorded 1 malicious and 1 suspicious detection, alongside a confirmed blacklist hit.

Regulatory Verification Notes

The homepage and product content identify Dr. Sergei Shushunov MD and Lev Laboratories Ltd. and state that the business develops and manufactures pediatric healthcare products. The site advertises remedies for infant colic, ear infection, fever, diarrhea, ADD, and ADHD, including Ear Drops, Fever Rub, PediaCalm, QuickLyte, and an ADHD-related product. These are health-related treatment claims, yet the supplied analysis records no claimed license, licensing authority, or license number; the operator's real-world identity remains unverified. This is a regulatory and disclosure matter requiring independent confirmation, not by itself proof of fraud. The site's valid transport encryption is a technical protection only and does not validate the seller or its medical claims.

EVIDENCE

- The homepage presents a direct-to-consumer catalog with prices, cart functionality, a contact form, and policy pages.
- The business model analysis records `license\_claimed: false`, with no licensing authority or license number supplied.
- The site is hosted on AS22612, identified as NAMECHEAP-NET — Namecheap, Inc., US.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-10T16:30:08+00:00.

What to Verify Next

Before any transaction or submission of sensitive information, an independent check should confirm the legal seller, the authority to market pediatric treatment products in the relevant jurisdiction, and the evidentiary basis for the medical claims. The contact and policy pages should be cross-checked through an independently obtained business record or offline contact route, and any proposed payment should use a method with meaningful dispute and buyer-protection rights. Account creation, credential reuse, and financial commitment should remain suspended until those checks are completed.

EVIDENCE

- The homepage identifies both a named physician and Lev Laboratories Ltd. as the apparent commercial operator.
- The site provides contact and policy pages but the independent identity connection is recorded as unverified.
- The purchase flow includes ecommerce cart functionality rather than being limited to informational content.

Summary Verdict

The overall posture is **low trust**, with a confirmed external reputation contradiction outweighing the site’s otherwise coherent ecommerce presentation and technical stability. The website should be treated as an unverified entity with elevated risk around sensitive interactions and commercial reliance.

Infrastructure Integrity

The site resolves directly to one likely origin address and has no detected CDN or WAF layer; hosting is provided by Namecheap, Inc. in the United States on AS22612. This is ordinary hosting infrastructure, but it provides no independent assurance of operator legitimacy and offers less intermediary protection than a clearly identified, established edge-service deployment.

Closing Assessment

The appropriate interim posture is read-only review while independent identity, regulatory authority, product substantiation, and payment-protection checks are completed; login, credential submission, and purchasing should not proceed before that validation.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 4healthykids.com.

- The request stayed on 4healthykids.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by russianhunting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-23. NOTED
- The earliest public archive of this site is from 2002-09-21. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 4healthykids.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
