

Is 4mationdrilling.com safe? TrustSniffer's moderate-trust assessment: 70/100

4mationdrilling.com

Verdict

70

OUT OF 100

MODERATE TRUST

4mationdrilling.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Local Nigerian drilling and energy-services company site listing services, training offerings, contact info and physical address. No payment or credential collection seen.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 4mationdrilling.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

4mation Drilling Services Limited is a Nigerian corporate-services website presenting project management, drilling services, human-capital development and training, logistics, renewable-energy consultancy, and related energy-sector advisory work. Its apparent business model is to generate revenue through commercial client engagements and paid professional training rather than through financial products, investments, or credential-driven transactions.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed across the available site content and technical behavior. The homepage presents a coherent corporate-services profile, contains no login or payment form, and exposes only a captcha-based contact interaction. Three abuse reports were associated with the observed IP address, but the reports were attributed to shared content-delivery infrastructure, which was whitelisted and carried zero confidence; they therefore do not constitute evidence of malicious activity by this website.

EVIDENCE

- The homepage identifies the business as “4mation Drilling Services Limited” and describes drilling, project-management, training, logistics, and renewable-energy services.
- Behavioral inspection recorded no login form, hidden form, wallet interaction, credential submission, clipboard hijacking, cloaking, or suspicious inline scripts.
- The domain was registered on 2019-10-22 and is approximately 6.83 years old.
- Web-archive coverage comprises 286 snapshots spanning 2020–2026, with 7 years tracked and a maximum observed gap of 1 year.

Regulatory Verification Notes

The available corporate and contact presentation is consistent with a local Nigerian energy-services business, including a named entity and a physical Port Harcourt address. The site does not claim a financial, investment, or brokerage license, and no license number or licensing authority is presented; this is a regulatory-disclosure gap rather than evidence of impersonation or fraud. The domain uses registration privacy through Withheld for Privacy ehf and NAMECHEAP INC, which limits direct attribution of the registrant but is an administrative registration detail rather than an identity contradiction. No broker match was returned in the available third-party context.

EVIDENCE

- The site's corporate presentation names “4mation Drilling Services Limited” and gives a physical address in Trans-Amadi, Port Harcourt, Rivers State, Nigeria.
- The site presents a standard corporate/services business model and no financial product, investment-return, or brokerage solicitation.
- The website is served from AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- The transport certificate is issued by YR1, uses DV validation, and is valid to 2026-11-14.

What to Verify Next

Before a high-value contract, procurement commitment, or paid training engagement, an organization should confirm the company's legal registration and any sector-specific permissions with the relevant Nigerian registry or regulator. The published business address and telephone channels should be independently validated through an offline or separately sourced channel, and training purchasers should confirm course accreditation, instructor credentials, deliverables, cancellation terms, and invoicing details before payment.

EVIDENCE

- The contact presentation provides a physical Port Harcourt address and Nigerian telephone numbers for independent confirmation.
- The site offers a Contact Us route with a captcha form and does not request credentials or payment details through the observed form.
- The services and training pages provide the stated basis for checking scope, accreditation, and contractual deliverables before engagement.

Summary Verdict

The website supports a **moderate-trust, apparently legitimate corporate-services posture**, with no observed scam or impersonation contradictions. Its established technical and historical footprint is consistent with a functioning business website, while independent operator attribution remains incomplete; consequently, the evidence supports ordinary research and engagement enquiries but not unconditional reliance for high-value commitments.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed traffic terminating at an Amazon-hosted edge address rather than an independently visible origin. This reduces direct exposure of the origin environment and is a mitigating security characteristic, but it does not independently establish the operator’s identity or legitimacy.

EVIDENCE

- Observed edge infrastructure: 76.76.21.21 on AS16509, Amazon.com, Inc., US; no origin candidate was identified.

Closing Assessment

Proceed with normal site use and preliminary business enquiries, while completing independent commercial and registration checks before any high-value commitment, sensitive submission, or payment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 76.76.21.22 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 4mationdrilling.com.

- The request stayed on 4mationdrilling.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-22. NOTED
- The earliest public archive of this site is from 2020-01-11. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 4mationdrilling.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
