

Is 4x.si safe? TrustSniffer's moderate-trust assessment: 70/100

4x.si

Verdict

70

OUT OF 100

MODERATE TRUST

4x.si is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Small URL shortening service offering link shortening plus click/impression tracking. The page lists recent shortened targets, contact email, and links to login/register. Limited corporate/monetization disclosure.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 4x.si served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

4x.si is a small web utility that presents URL shortening, click and impression tracking, smart widgets, and account access through login and registration paths; its apparent business model is link management with optional enhanced analytics and related paid or promotional features.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no confirmed phishing, impersonation, malicious-content, or blacklist finding. The homepage describes an ordinary link-management utility rather than a financial or investment service, and its captured behavior showed no external posting, hidden forms, wallet activity, cloaking, or suspicious scripts. The principal operational concern is inherent to URL shorteners: shortened destinations can obscure the final target, while the site's displayed recent targets include multiple third-party domains. This is a usage consideration, not evidence that 4x.si itself is fraudulent.

EVIDENCE

- The homepage identifies the service as a URL shortener that counts impressions and clicks, with additional data available by adding “+” to a shortened URL.
- The homepage lists recent shortened targets, including domains hosted on Wix, Bitly, Cuttly, and other third-party services.
- The domain was registered on 2020-08-25 and is approximately 5.99 years old.

Regulatory Verification Notes

The site’s apparent identity is only partially established independently. Its About and homepage content provide a functional description and a copyright reference but limited corporate, ownership, and monetization detail; no licensing or registration number is presented in the captured pages. Because the service is presented as a general web utility rather than a regulated financial product, this is a transparency and identity-verification matter rather than evidence of a scam. The site was registered through Domenca, and the available external reputation checks produced no malicious or suspicious result; coverage was not complete, so that signal should be treated as supportive rather than conclusive.

EVIDENCE

- The homepage and About path describe URL shortening and analytics but do not identify a legal entity or licensing authority.
- Domain registration lists Domenca as registrar, with an expiration date of 2027-08-25.
- The site is served from AS43128, DHH-AS - DHH-AS, SI.
- Transport encryption uses a DV certificate issued by YR1, valid through 2026-11-09.

What to Verify Next

Before sensitive account activity or any high-value commercial arrangement, the prospective user should independently confirm the operating entity, applicable terms, privacy practices, data-retention approach, and the basis on which link analytics are provided. Destination URLs should be inspected through an independent scanning or preview mechanism before opening, particularly when a shortened link arrives from an untrusted source. Official support and contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides links to About, LOGIN, and REGISTER, making those pages the relevant locations for reviewing identity and account-use terms.
- The captured homepage contains no sensitive submission form, so account and data-handling conditions require review on the applicable account and policy pages.
- The displayed service description indicates that click and impression data are collected, making privacy and retention terms material verification points.

Summary Verdict

4x.si presents as an apparently ordinary, established URL-shortening utility with no observed scam or impersonation contradiction. Its overall posture is **moderate trust**: suitable for routine, lower-risk informational

use, while the independently unverified operator identity and limited business disclosure prevent a stronger conclusion.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and an observed edge address is 52.20.84.62 on AS14618. This adds resilience and reduces direct exposure of the service infrastructure, but it is a mitigating security characteristic rather than proof of operator legitimacy.

Closing Assessment

Routine use may proceed on a proportionate basis, with independent checks completed before credentials, sensitive data, or material financial value are placed at risk.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 4x.si.

- The request stayed on 4x.si. It was not redirected to another domain. CLEAR
- Registration is published under Domenca. CLEAR
- DNS for this domain is served by 101.71), across 2 name servers. NOTED
- The registration is paid up to 2027-08-25. NOTED
- The earliest public archive of this site is from 2021-11-24. CLEAR
- It is hosted on DHH-AS, from a server in SI. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 4x.si at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
