

Is 6365-28.com a scam? TrustSniffer's high-risk assessment: 0/100

6365-28.com

Verdict

0

OUT OF 100

CRITICAL RISK

6365-28.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Short static landing page in Chinese stating brand trustworthiness and service integrity. No forms, links, or contact/legal details found.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://6365-28.com/>

What 6365-28.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

6365-28.com is a very sparse Chinese-language promotional landing page presenting short brand-oriented claims such as “trusted brand selection,” “quality service,” and “honest operation,” with no visible transactional workflow; its apparent purpose is to function as a static brand showcase rather than a clearly identified operating business.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence identifies the domain as blacklisted and records multiple malicious detections, including coverage from Fortinet and Sophos. This reputation signal outweighs the otherwise limited page-level indicators: the homepage contains no login form, hidden sensitive form, wallet connection, or explicit brand-impersonation evidence, and the observed browser activity did not show cloaking or credential capture. The site should therefore be treated as unsafe for credentials, account access, financial activity, or other sensitive interaction. The two abuse reports associated

with the observed IP are not independently probative because they concern shared Cloudflare infrastructure and were explicitly discounted on that basis.

EVIDENCE

- The homepage is a 66-character static landing page containing brand-promotion and trustworthiness language but no transactional interface.
- Browser observation recorded two external XHR requests and two external POST requests to non-whitelisted destinations; no hidden forms or password-submission forms were detected.
- Registration telemetry records creation on 2026-07-05 and an age of 0.12 years.
- Historical capture records show 16 snapshots spanning 2024–2025, with 2 years tracked.

Regulatory Verification Notes

The available page content does not identify a legal entity, provide contact or legal-information pages, or state a licensing authority or license number. This creates a material disclosure and operator-verification gap, particularly because the site's stated service-integrity claims are not supported by substantive corporate or regulatory information. Independent broker-reputation context produced no name match, but that result is not a licensing determination. The site's identity remains unverified, and the available evidence does not establish that it is operated by a regulated or identifiable business.

EVIDENCE

- The homepage provides no company name, registered address, terms, privacy notice, contact details, license claim, or license number.
- Registration records identify Namemart Limited as registrar; the registrant is not established by the supplied evidence.
- Network telemetry identifies AS13335 operated by Cloudflare, Inc.; the site's transport certificate is DV, issued by WE1, and valid to 2026-10-09T17:36:08+00:00.
- No match was returned in the supplied third-party broker-reputation context.

What to Verify Next

Before any engagement, an independent registry check should establish the operating entity and confirm any authorization required for the services represented by the site. Contact details should be validated through an independently sourced channel rather than relying solely on the landing page, and any proposed account, payment, download, or credential workflow should be assessed by the institution's security controls before use.

EVIDENCE

- The homepage contains no independently verifiable operator or regulatory details against which a registry search can be anchored.
- The site exposes no visible login, payment, or service workflow for controlled validation.
- The external security findings require resolution by the relevant security and fraud-review process before sensitive interaction is approved.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The site's identity is unverified, its content is insufficient to substantiate a legitimate operating model, and the confirmed external reputation contradiction prevents the site from being treated as trustworthy.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF and resolves through CDN edge infrastructure rather than a directly exposed origin. This provides a useful layer of delivery and exposure mitigation, but edge protection is only an infrastructure control and does not validate the site's operator or legitimacy.

Closing Assessment

Institutional policy should block or isolate sensitive interaction with the site pending independent resolution of its identity, regulatory basis, and external security detections.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 104.21.58.233 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 6365-28.com.

- The request stayed on 6365-28.com. It was not redirected to another domain. CLEAR
- Registration is published under Namemart Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-05. NOTED
- The earliest public archive of this site is from 2024-04-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 6365-28.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
