

Is 6h812.com a scam? TrustSniffer's high-risk assessment: 0/100

6h812.com

Verdict

0

OUT OF 100

CRITICAL RISK

6h812.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A single-word welcome landing page with no links, forms, or identifiable monetization.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	21 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	15% confidence AbuseIPDB, 18 reports; shared hosting inflates reports	CLEAR
Domain age	6.2 years old Registered history	CLEAR
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by GoDaddy TLS Intermediate CA DV - R1v1	NOTED

The page as captured

https://6h812.com/

What 6h812.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal landing page presenting only the word “welcome!” to visitors, with no visible business description, service offering, transaction flow, or identifiable operating purpose.

Scam/Impersonation Risk

The site presents a confirmed **blacklist** and multiple malicious detections across external reputation checks, creating a direct contradiction to treating it as a safe destination for sensitive interaction. The observed page itself contains no login form, credential request, payment mechanism, brand-imitation indicators, or conflicting legal identities; however, this limited and largely content-free presentation does not offset the external threat findings. Reports associated with one shared content-delivery IP are relevant as contextual reputation evidence but are attributed to shared infrastructure rather than uniquely to the website. No identity contradiction or confirmed brand impersonation was observed. Evidence:

- External reputation checks recorded 21 malicious detections and a confirmed blacklist for the domain.

- The homepage contains only “welcome!” and has no links, forms, or visible monetization.
- Archive records show 46 snapshots spanning 2021–2026, covering 6 years tracked.
- A shared Amazon Technologies Inc. content-delivery IP was associated with 18 abuse reports; the attribution identifies shared infrastructure as the subject context.

Regulatory Verification Notes

The website does not provide enough substantive content to establish an operator, regulated business activity, or licensing position. Its operator identity remains unverified, and the homepage contains no stated license, registration number, terms, or other legal disclosure; this is a verification gap rather than, by itself, proof of misconduct. The domain is registered through GoDaddy.com, LLC, and the site uses valid domain-validated transport encryption, but these are infrastructure and registration facts—not evidence that the operator is licensed or independently identified. Evidence:

- Domain registration: 2020-06-23; age 6.16 years.
- Registered through GoDaddy.com, LLC.
- Served from AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2027-01-09.

What to Verify Next

Before any sensitive engagement, an independent party should establish the real-world operator through an authoritative corporate or regulatory registry, confirm whether the intended activity requires licensing, and validate any support or contact channels through an offline or independently sourced route. Until those checks produce a verifiable counterpart and a clear legal purpose, interaction should remain limited to non-sensitive observation. Evidence:

- The homepage supplies no operator identity or legal disclosure from which independent verification can begin.
- No credential, payment, or other sensitive form was observed during the captured page interaction.
- The site's visible content does not state a business model or regulated service.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. Available evidence supports treating the website as an unverified and materially unsafe destination for credentials, account access, or financial activity.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with all observed addresses belonging to edge infrastructure and no origin-server candidate identified in this analysis. This provides a mitigating layer against direct origin exposure but does not establish site legitimacy or neutralize the external threat assessment. Evidence:

- CDN/WAF protection was detected; 2 observed addresses were classified as edge IPs and 0 as likely origin IPs.
- Observed edge addresses were 15.197.225.128 and 3.33.251.168.

Closing Assessment

Prospective users and organizations should defer login, credential submission, and financial transactions until independent identity, legal status, and contact-channel checks produce satisfactory results.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 18 reports on hosting IP 3.33.251.168 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 6h812.com.

- The request stayed on 6h812.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-23. NOTED

- The earliest public archive of this site is from 2021-07-26. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 6h812.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
