Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Chinese-language promotional landing page for the K8 online casino brand, presenting links into live gameplay and wagering services while claiming DICJ regulatory oversight, a 20-year brand history, and an official Asia partnership with Atlético de Madrid.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. A confirmed blacklist signal is corroborated by multiple external detections, including malicious classifications from security providers; this is a direct contradiction to the site's promotional trust and regulatory claims. The homepage is a thin promotional entry point that directs visitors toward gameplay without visible verification, terms, contact details, or a transparent value flow. Its deposit-before-service model creates material exposure because funds may be committed before the operator, applicable protections, and withdrawal arrangements are independently established. No separate identity contradiction or brand-impersonation finding was identified, but the confirmed blacklist status alone warrants a clearly defensive posture.

EVIDENCE

- The homepage contains only 154 characters of visible text and provides three gameplay-entry links without supporting verification or terms.
- External reputation checks recorded 15 malicious detections and 1 suspicious detection from 21 evaluated results, with three tier-one security providers flagging the domain.
- Domain registration telemetry records creation on 2026-01-20 and an age of 0.58 years through Spaceship, Inc.
- Archive telemetry records 92 snapshots spanning 2021–2026, with 6 years tracked.

Regulatory Verification Notes

The homepage claims compliance with the Macau博彩監察協調局 (DICJ) and presents a sports-partnership claim, but supplies no license number, verifiable authorization evidence, operator identity, contact information, or terms. The real-world operator therefore remains unverified, and the legal-status claims should not be treated as established regulatory evidence. The absence of a matching record in the supplied broker-reputation dataset provides no positive licensing conclusion and is not a regulatory determination.

EVIDENCE

- The homepage states that the service operates under DICJ licensing and supervision but displays no license identifier or supporting documentation.
- The homepage claims an official Atlético de Madrid Asia partnership without presenting corroborating details.
- The domain is registered through Spaceship, Inc.
- The site uses a DV TLS certificate issued by WE1, valid through 2026-10-14.

What to Verify Next

Before any sensitive interaction, an independent check should confirm the claimed authorization directly with the relevant Macau regulatory registry and establish whether the exact domain is covered by that authorization. The operator's legal name, responsible jurisdiction, dispute and withdrawal terms, and payment-recipient identity should be obtained through an independently sourced channel rather than relying on the landing page. Any claimed sports affiliation should also be confirmed through the club's official partnership communications.

EVIDENCE

- The homepage provides regulatory and partnership claims but no license number, legal entity, contact details, or terms.
- The landing page contains no visible forms, login interface, or sensitive-input fields, so operator and payment verification remain unresolved before navigation to gameplay.
- The site's observed behavior included two external XHR requests and two external POST requests, all classified as non-whitelisted external activity.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not establish a trustworthy connection to a verified real-world operator, while the convergence of external threat detections, unsupported claims, and deposit-led activity indicates that the site should be treated as materially unsafe for account, credential, or financial use.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF infrastructure, which is a mitigating control for edge-level exposure but does not validate the operator or offset the reputation findings. All observed addresses were CDN edge addresses, with no origin candidate identified in the analysis.

EVIDENCE

- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Four observed IP addresses were identified as Cloudflare CDN edge addresses; likely origin IP count was 0.
- The infrastructure resolution status was resolved, with Cloudflare identified as the detected CDN provider.

Closing Assessment

Prospective users should restrict activity to passive viewing and should not submit credentials, make deposits, or conduct financial transactions through the site unless the operator, authorization, and payment protections have first been independently validated.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 787189.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
