

Is 7mmtv.sx legit? TrustSniffer's high-trust assessment: 90/100

7mmtv.sx

Verdict

90

OUT OF 100

HIGH TRUST

7mmtv.sx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 55%.

What this site appears to be

A multilingual adult-video index offering large censored, uncensored, amateur, and mosaic-reduction catalogs, with videos reportedly embedded or linked from outside hosts. The page includes piracy-oriented disclaimers and at least one title apparently referring to a child, substantially increasing content-safety and legal risk.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a multilingual adult-video aggregation and indexing service presenting extensive censored, uncensored, amateur, live-cam, hentai-game, and mosaic-reduction catalogs, with viewing content linked from or embedded through external hosts and an apparent advertising, referral, or outbound-traffic business model.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identity, or other identity contradiction was observed. The homepage contains no login or sensitive-data form, and behavioral testing found no hidden forms, wallet interaction, clipboard manipulation, cloaking, or suspicious inline scripts. This supports the conclusion that the site is not operating as a credential-theft or financial-fraud mechanism. Separately, a video title apparently referring to a child presents a serious content-safety and potential legality concern; that issue affects the acceptability of the indexed material but does not establish impersonation or scam activity.

- The homepage is identified as an adult-video aggregation/index page and contains no login form, sensitive form, or untrusted form destination.
- Interactive testing completed successfully without detected cloaking, hidden forms, wallet-drainer behavior, clipboard hijacking, or suspicious inline scripts.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browsing warning, and no confirmed threat-list match.
- The domain has a top-tier global traffic footprint, ranked 7,978 in the observed traffic dataset.

Regulatory Verification Notes

The homepage describes externally sourced adult material and includes piracy-oriented disclaimers, creating meaningful copyright, content-governance, and jurisdictional-compliance considerations. The analyzed page does not establish a named operating entity, rights-licensing framework, age-assurance process, or formal regulatory status; the reported inability to substantiate a contact or address is therefore a disclosure limitation. No financial service, investment-return proposition, or sensitive financial interaction is presented, so financial licensing is not indicated by the observed business model. No broker-profile match was found, but that is contextual reputation information rather than a legal determination.

- The homepage states or implies that videos are indexed from external sources and presents catalogs spanning uncensored material, live cams, and hentai games.
- The analyzed homepage produced an “unverifiable contact or address” content flag.
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-10-01.

- The observed page contains no deposit, investment-return, cryptocurrency, or regulated brokerage proposition.

What to Verify Next

Before institutional engagement, the site operator's legal identity, governing jurisdiction, content-licensing basis, takedown process, and age-assurance controls should be confirmed through independently obtained documentation. Enterprise reviewers should also establish whether the indexed categories and outbound destinations comply with internal acceptable-use, safeguarding, copyright, and regional content rules. Official contact channels should be confirmed through an independent route.

- The homepage does not supply the legal and operational documentation needed to validate content rights or operator accountability.
- The page links to an external video host, making third-party destination governance relevant to an engagement review.
- The catalog is multilingual and encompasses several content classes, increasing the number of potentially applicable jurisdictional and safeguarding requirements.

Summary Verdict

The site presents as a legitimate, established, and technically stable adult-content aggregator, with strong traffic adoption and clean security-reputation convergence supporting a high-trust website assessment. No evidence indicates phishing, impersonation, credential theft, or financial fraud, although trust in the site's technical legitimacy should remain distinct from approval of every item it indexes.

Infrastructure Integrity

Cloudflare provides the site's CDN/WAF layer, and all four observed addresses were edge servers; no origin candidate was exposed during the assessment. This arrangement reduces direct origin exposure and is a mitigating security control, though protective infrastructure is not independently proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- Four Cloudflare edge addresses were observed, comprising all resolved addresses.

Closing Assessment

Normal interaction, including account login and standard use where offered, is appropriate, subject to ordinary organizational content-policy, safeguarding, and jurisdictional controls.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 7mmtv.sx.

- The request stayed on 7mmtv.sx. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 7mmtv.sx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
