

Is 8090qc.com safe? TrustSniffer's moderate-trust assessment: 70/100

8090qc.com

Verdict

70

OUT OF 100

MODERATE TRUST

8090qc.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Website for a Zhengzhou-based signage design and manufacturing company offering custom signs, lightboxes, bus shelters and installation services. The page contains company information, contact numbers, addresses, product categories and many repeated SEO keywords. No login, payment flows, or investment/crypto solicitations identified.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents itself as a Zhengzhou-based signage design and manufacturing company offering custom identification systems, advertising lightboxes, bus shelters, public-area signage, project design, and installation services for commercial, institutional, transport, healthcare, education, and government environments.

Scam/Impersonation Risk

No contradictions were observed, and the available evidence does not identify phishing, impersonation, malicious behavior, login forms, payment flows, investment solicitations, or cryptocurrency activity. A material content-integrity anomaly is present: the homepage title and navigation contain repeated gambling-related SEO strings, including “365bet” references and World Cup betting language, despite the substantive page presenting a signage business. This appears more consistent with compromised, repurposed, or poorly maintained SEO content than with a confirmed impersonation finding, but it reduces confidence that the visible content is fully controlled and curated by the stated business.

EVIDENCE

- The homepage describes signage design, manufacturing, lightboxes, bus shelters, project examples, and installation services, while its title and menu include repeated gambling-related terms.
- The homepage and observed browser behavior contained no login form, hidden sensitive form, external password form, wallet activity, clipboard interception, or external POST activity.
- The domain was registered on 2022-09-29 and is approximately 3.9 years old.
- Historical records span 2021-06-19 through 2026-02-26, representing 6 years tracked.

Regulatory Verification Notes

The site provides business-oriented company information, telephone contact details, addresses, product categories, project examples, and sections for company culture, honors, team information, recruitment, and contact. The reviewed material does not independently verify the real-world operator or establish a legal entity connection. No license or registration number is claimed in the available content; this is a disclosure and contracting verification point rather than evidence of a scam, particularly because the stated activity is physical signage manufacturing rather than an identified regulated financial service. The external reputation evidence contains no malicious or suspicious finding, although coverage is partial, and no broker-related match was identified.

EVIDENCE

- The homepage presents the business as a corporate signage manufacturer and lists physical products and project categories rather than regulated financial services.
- The available company and contact content does not provide an independently verified legal-entity connection or license number.
- The domain registrar is NameSilo, LLC.
- The site is hosted by PEG-LA - PEG TECH INC in the United States on AS398823; its TLS certificate is issued by YR2 at DV validation level and is valid to 2026-11-02.

What to Verify Next

Before a substantial commercial engagement, the prospective counterparty should confirm the company's legal name, registered address, contracting entity, and ownership of the published telephone numbers through an independent business registry or an offline channel. Quotations, invoices, warranties, installation obligations, and return or remediation terms should be obtained in writing and matched to the contracting entity. Payment should use a method providing appropriate commercial recourse, and the gambling-related homepage content should be clarified before relying on the site as the company's official web presence.

EVIDENCE

- The contact and company-information pages provide the starting points for independent confirmation of the contracting entity and telephone details.
- The product and project pages should be matched against a formal quotation, specification, warranty, and installation agreement.
- The terms and ordering workflow, if used for a proposed transaction, should be reviewed for the named seller, payment recipient, delivery obligations, and dispute provisions.

Summary Verdict

Available evidence supports a **moderate-trust, apparently business-oriented website** with no observed scam or impersonation contradiction. Confidence is limited because the site's real-world operator has not been independently verified and the homepage contains substantial subject-matter inconsistency. The site is more consistent with a conventional small-business presence than with an active phishing or financial-abuse operation.

Infrastructure Integrity

The website resolves to a single apparent origin address and is not identified as using a CDN or WAF. Hosting is provided by PEG-LA - PEG TECH INC on AS398823 in the United States. This infrastructure is technically coherent for a small business site, but hosting arrangements alone do not establish legitimacy.

Closing Assessment

Ordinary browsing is proportionate, while substantial purchase commitments or disclosure of sensitive information should follow independent counterparty confirmation and payment-protection checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 8090qc.com.

- The request stayed on 8090qc.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2026-09-29. NOTED
- The earliest public archive of this site is from 2021-06-19. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 8090qc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
