

Is 87558dhy.vip a scam? TrustSniffer's high-risk assessment: 0/100

87558dhy.vip

Verdict

0

OUT OF 100

CRITICAL RISK

87558dhy.vip shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal parking page for 87558dhy.vip indicating the domain may be for sale; contains Terms of Service and Privacy Policy links text but no product, forms, or interactive elements.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What 87558dhy.vip served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal parked-domain landing page for 87558dhy.vip that states the domain may be for sale and provides only generic information, Terms of Service, and Privacy Policy links; it presents no active product, service, transaction flow, or identifiable operating business.

Scam/Impersonation Risk

The site carries a **confirmed blacklist signal**, with 16 malicious detections among evaluated security services and alerts from multiple established security providers. This is a material contradiction to ordinary trust expectations and remains significant even though the captured page itself contains no login form, payment mechanism, wallet connection, or apparent brand-impersonation content. The page therefore appears inactive rather than demonstrably safe: its limited current functionality does not resolve the external reputation problem. No distinct legal-entity inconsistency or visible impersonation was observed.

EVIDENCE

- External security assessment recorded 16 malicious detections and 0 suspicious detections among 21 effective evaluations; a blacklist condition was also recorded.
- The homepage contains only 153 characters of substantive text and states that the domain may be for sale; no active interaction surface is present.
- The registration record gives a creation date of 2026-05-14 and a WHOIS age of 0.27 years; reconciled registration continuity is 1.09 years.
- Web-archive telemetry records 1 snapshot spanning 2025–2025, with 1 year tracked.

Regulatory Verification Notes

The available legal and policy presentation is insufficient to establish an operating entity, regulated activity, or licensing status. The homepage offers only generic Terms of Service and Privacy Policy links, while the site describes no product or service for which authorization could be assessed. This is a verification gap rather than a standalone finding of unlawful conduct; however, the independently recorded blacklist and malicious-detection signals materially reduce the confidence that could otherwise be placed in the site. The real-world operator identity remains unverified.

EVIDENCE

- The homepage presents Terms of Service and Privacy Policy links but no company name, registered address, license number, or regulatory authority.
- The site's transport encryption is DV-level, issued by YR2, and valid to 2026-10-10.
- Hosting is on AS133618, TRELLIAN-AS-AP – Trellian Pty. Limited, AU.
- The domain registrar is CommuniGal Communication Ltd.

What to Verify Next

Any future claim that this domain represents a business, financial service, or regulated provider should be checked against the relevant official corporate and licensing registries using independently obtained details. The policy pages should be reviewed for a named operator, jurisdiction, dispute terms, and enforceable contact route; absent those details, no sensitive interaction should be initiated. Official contact channels should also be confirmed through an independent, offline or separately established source before any engagement.

EVIDENCE

- The homepage identifies the domain as potentially for sale rather than presenting an operating business.
- No product description, service terms, transaction workflow, or user-account functionality is available for validation.
- The captured page contains no forms, external submissions, hidden forms, wallet-provider activity, or sensitive-input fields.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Available evidence does not establish a trustworthy operating identity, and the external reputation contradiction is sufficiently serious that the site should not be treated as a legitimate destination for account access, credential submission, or financial activity.

Infrastructure Integrity

The site resolves directly to a single likely origin address, 103.224.212.211, with no CDN or WAF identified. This provides no meaningful protective infrastructure layer capable of mitigating the recorded reputation concerns; the presence of valid TLS protects transport confidentiality but does not validate the site or its operator.

EVIDENCE

- One unique IP was observed, with 0 edge IPs and 1 likely origin IP.
- No CDN or WAF vendor was detected.
- The resolved address is 103.224.212.211 in Australia.

Closing Assessment

Enterprise controls should block or isolate the domain for sensitive workflows and require independent identity, authorization, and contact verification before any future engagement is considered.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 87558dhy.vip.

- The request stayed on 87558dhy.vip. It was not redirected to another domain. CLEAR
- Registration is published under CommuniGal Communication Ltd.. CLEAR
- DNS for this domain is served by abovedomains.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-14. NOTED
- The earliest public archive of this site is from 2025-07-20. CLEAR
- It is hosted on TRELLIAN-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 87558dhy.vip at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
