

Is 928xpj.com a scam? TrustSniffer's high-risk assessment: 0/100

928xpj.com

Verdict

0

OUT OF 100

CRITICAL RISK

928xpj.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Extremely minimal page containing only a short text 'welcome!'. No links, forms, or explanatory content present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	17 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR

The page as captured

https://928xpj.com/

What 928xpj.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at 928xpj.com presents visitors with only the word “welcome!” and no explanatory content, navigation, product description, contact information, or visible transaction flow. Its apparent purpose is therefore an unidentified login-oriented or placeholder service rather than a transparently presented business.

Scam/Impersonation Risk

The site presents a critical sensitive-interaction risk. External reputation checks identified 17 malicious detections and a confirmed blacklist hit from multiple external sources; this is a direct contradiction to treating the domain as a trustworthy service. The homepage’s login-only presentation provides no context for the service, operator, or purpose. Eighteen abuse reports were also associated with an Amazon content-delivery-network IP, although that signal is attributed to shared infrastructure rather than uniquely to the website. No separate brand-impersonation or conflicting legal-identity finding was observed.

EVIDENCE

- The homepage contains only “welcome!” and no links, forms, explanatory text, or business context.
- External reputation telemetry recorded 17 malicious detections and a confirmed blacklist result for the domain.
- The domain was registered on 2022-03-16 and is approximately 4.44 years old.
- Archive records contain 9 snapshots spanning 2022–2026, representing 5 years tracked.

Regulatory Verification Notes

The captured homepage does not identify an operating company, jurisdiction, license, registration number, terms of service, or other regulatory basis. This is a material disclosure gap for a service that appears login-oriented, but the absence of a visible license claim is a verification issue rather than, by itself, proof of fraud. The available identity evidence does not independently connect the website to a verified real-world operator. Transport encryption is present, but a domain-validated certificate authenticates encrypted communications, not the legal identity or regulatory status of the operator.

EVIDENCE

- The homepage provides no company name, legal disclosure, licensing statement, registration number, or terms link.
- The domain is served from AS16509, Amazon.com, Inc., US.
- The TLS certificate is issued by GoDaddy TLS Intermediate CA DV - R1v1, uses DV validation, and is valid to 2027-01-06T10:21:16+00:00.

What to Verify Next

Before any authentication or financial interaction, an independent registry check should confirm the operator’s legal name, jurisdiction, and authorization for the service allegedly associated with the domain. Official support and contact channels should be confirmed through an independently sourced route rather than relying solely on information presented by the site. If the operator cannot be independently established, credentials should not be submitted and financial activity should not be initiated.

EVIDENCE

- The homepage exposes no operator identity or regulated-service disclosure to validate.
- Behavioral testing observed 12 external XHR requests and 4 external POST requests, including 2 non-whitelisted POST requests.
- The observed page produced no wallet-connection, hidden-form, password-external-form, or clipboard-write activity during testing.

Summary Verdict

The overall posture is critical, with the site unsuitable for sensitive interaction and its apparent legitimacy not established. The combination of confirmed external malicious reputation signals, an unexplained login-oriented presentation, and absent operator context outweighs the limited technical indicators showing that the site is reachable and encrypted.

Infrastructure Integrity

The website is behind a CDN/WAF layer, with observed edge addresses 15.197.225.128 and 3.33.251.168 on AS16509; no origin-server address was identified in this analysis. This edge protection may reduce direct exposure of the origin, but it is only a mitigating infrastructure characteristic and does not resolve the domain's reputation or identity concerns.

Closing Assessment

Prospective users should restrict activity to non-sensitive observation and refrain from authentication, credential submission, or financial interaction unless independent identity and authorization checks produce clear, reliable results.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The page presents a sign-in form, and the operator behind it could not be independently verified.

Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 18 reports on hosting IP 3.33.251.168 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 928xpj.com.

- The request stayed on 928xpj.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-16. NOTED
- The earliest public archive of this site is from 2022-12-01. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 928xpj.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
