Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

99Bitcoins is an established cryptocurrency media and education portal presenting Bitcoin and altcoin news, educational guides, exchange and wallet comparisons, market analysis, presale coverage, casino and betting rankings, affiliate promotions, newsletters, and courses; its apparent business model is advertising, referrals, sponsored content, and educational engagement rather than direct custody of user funds or sale of investment returns.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, blacklist findings, or malicious reputation signals were observed. The homepage's prominent coverage of no-KYC casinos, sports betting, Telegram gambling bots, crypto presales, exchange promotions, and "next 1000x" assets creates commercial and consumer-risk considerations, but these are presented within an informational and affiliate-content model rather than as evidence of fraudulent operation. The domain is long-established, with no observed repurposing or identity conflict.

- Homepage content identifies the service as "Latest Cryptocurrency News, Education, and Guides" and presents Bitcoin, Ethereum, exchange, wallet, betting, and presale material.
- Domain registration: 2013-11-19; age 12.7 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site's apparent role is media, education, comparison, and affiliate promotion, not a disclosed deposit-taking or investment-return service. Licensing or corporate-registration details are unclear in the supplied page evidence, so regulatory status should be treated as a transparency item requiring independent confirmation rather than as evidence of impersonation or fraud. The available third-party broker context produced no matching result.

- Homepage analysis classified the site as an informational cryptocurrency news and education portal with a low page-risk assessment.
- Hosting is recorded as AS13335, Cloudflare, Inc., US.
- TLS certificate: issuer WE1; validation level DV; valid through 2026-09-09.
- Traffic footprint is within the global top one million, with a recorded rank of 26737.

What to Verify Next

For regulated or financially consequential engagement, confirm any relevant licensing or corporate status through the applicable official registry and independently verify the site’s published contact and editorial-affiliation channels. Promotional claims should be evaluated against the underlying provider’s own terms, fees, and risk disclosures.

- The homepage contains two newsletter-subscription forms and no detected login or sensitive-data form.
- The stated business model relies on advertising, affiliate referrals, sponsored content, promotions, and newsletter or course engagement.
- No confirmed phishing, malicious script, wallet-drainer, clipboard-hijacking, or cloaking behavior was observed during the recorded site interactions.

Summary Verdict

The site presents a legitimate, established, and trustworthy posture for its stated media and education function. Normal interaction, including account login and standard use, is appropriate, while individual third-party promotions remain subject to their own terms and controls.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a meaningful mitigating layer, and all observed addresses were CDN edge infrastructure rather than exposed origin infrastructure. This supports a conventional, professionally protected web deployment but is not, by itself, proof of legitimacy.

- Four observed edge addresses were associated with AS13335.
- Infrastructure identified Cloudflare CDN/WAF protection with no origin candidate observed.

Closing Assessment

Normal browsing, account use, and standard site interaction are appropriate; financially consequential decisions should remain tied to independent confirmation of the specific external service involved.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of 99bitcoins.com.

- The request stayed on 99bitcoins.com. It was not redirected to another domain. CLEAR
- Registration is published under SafeNames Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-11-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about 99bitcoins.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
