

Is a-taiyo.net legit? TrustSniffer's high-trust assessment: 100/100

a-taiyo.net

Verdict

100

OUT OF 100

HIGH TRUST

a-taiyo.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Japanese-language site for a Kagoshima-based printing shop (Awning Taiyo) offering custom banners, tapestries, stickers, posters, and signage with ordering flow and company information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Japanese-language local-business site for Awning Taiyo in Kagoshima, presenting a custom-printing and signage service with product information, pricing, company information, and an enquiry-to-order process for physical commercial and promotional materials.

Scam/Impersonation Risk

No contradictions were observed. The homepage and service pages describe a conventional printing business offering custom banners, tapestries, stickers, posters, cutting sheets, flags, and signage rather than financial, cryptocurrency, or investment services. The site presents company information, production examples, ordering guidance, and commercial-policy pages; technical inspection also found no login form, hidden sensitive form, wallet connection, suspicious script, cloaking, or external posting activity. Available reputation checks reported no malicious or suspicious detections, no phishing or impersonation indicators, and no confirmed blacklist finding. The contact and estimate pathway nevertheless remains a normal business channel that should be independently associated with the merchant before payment.

EVIDENCE

- The homepage identifies Awning Taiyo as a Kagoshima provider of custom banners, hanging banners, tapestries, stickers, posters, and signage.
- The ordering and service pages describe material selection, size and shape selection, quotation, and order placement for physical printed goods.
- The domain was registered on 2008-04-16 and is approximately 18.36 years old.
- Historical records show 68 archive snapshots spanning 2008–2026, covering 19 tracked years.

Regulatory Verification Notes

The website appears to operate as a local printing and signage merchant, not as a business model that inherently requires financial-services licensing. Its navigation includes company information, company overview, specified commercial-transaction disclosures, privacy policy, pricing, payment information, and enquiry/estimate pages. The supplied site content does not present a formal license or registration number, so the relevant verification point is the merchant's legal identity and commercial disclosure rather than financial authorization. The site also displays references to industry associations and technical certifications; these are on-site claims and should not be treated as independently validated accreditation. The real-world operator identity remains unverified despite the broader evidence being consistent with an established site.

EVIDENCE

- The company-information section includes a company overview and a page for disclosures under Japan's Specified Commercial Transactions Act.
- The site provides dedicated pricing, payment-information, privacy-policy, and enquiry/estimate navigation.
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid through 2026-11-13.
- Domain registration is through XServer, Inc.

What to Verify Next

Before a credential or payment interaction, an independent business record or offline contact route should be used to confirm that the merchant identity, ordering entity, and payment recipient correspond. The applicable return, cancellation, delivery, and payment-protection terms should be reviewed in the commercial-policy and payment-information pages, with a low-value test order preferred where practical. Any claimed association membership or certification should be confirmed with the named issuing organization if it materially affects procurement approval.

EVIDENCE

- The site provides a company-information area intended to identify the business and its services.
- The ordering flow directs visitors from material and size selection through quotation and final order.
- The site includes separate pages for payment information and specified commercial-transaction disclosures.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate local-business website. The classification is strong, while independent attribution of the real-world operator is not yet established; this distinction warrants ordinary commercial due diligence without indicating a scam or impersonation condition.

Infrastructure Integrity

The site is hosted directly by XSERVER – Xserver Inc., Japan, on AS131965, with one resolved hosting address and no detected CDN or WAF layer. This is a conventional direct-hosting arrangement; the valid DV TLS certificate provides transport protection, while the absence of an intermediary edge service means there is no additional CDN/WAF mitigation to rely upon.

Closing Assessment

Normal browsing and ordinary commercial engagement are proportionate to the assessed posture, subject to independent confirmation of merchant identity, return terms, and payment protections before credentials or payment details are provided.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of a-taiyo.net.

- The request stayed on a-taiyo.net. It was not redirected to another domain. CLEAR
- Registration is published under XServer, Inc.. CLEAR
- DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
- The registration is paid up to 2028-04-16. CLEAR
- The earliest public archive of this site is from 2008-06-17. CLEAR
- It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about a-taiyo.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
