Full analysis

Overview

A1 Gravure is a corporate B2B manufacturing website for rotogravure printing cylinders, presenting industrial products, chemical engraving and precision-manufacturing services for packaging, pharmaceutical, paper and printing customers in India. Its apparent business model is direct sale and custom supply of printing components rather than financial services or consumer credential collection.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent manufacturing purpose across its homepage, About, Products, Industries and Contact pages, with no detected phishing, impersonation, credential-harvesting or malicious-content indicators. Its published business model is operationally plausible: supplying rotogravure cylinders, offering chemical etching and quality control, and serving identifiable industrial sectors. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator has not been independently verified.

EVIDENCE

- The homepage identifies A1 Gravure as a manufacturer and supplier of rotogravure printing cylinders and states that the business was established in Ahmedabad in 2004.
- The Products and Industries pages describe chemical engraving, precision cylinders and service to packaging, pharmaceutical, paper and printing sectors; no financial-services or cryptocurrency functionality was observed.
- The site's transport and behavioral checks showed no login form, hidden sensitive form, wallet connection, clipboard manipulation or cloaking behavior.
- Domain registered 2019-04-05 (~7.38 years old); historical captures recorded 74 snapshots spanning 2021–2026, with 6 years tracked.

Regulatory Verification Notes

The website's disclosure is appropriate to a manufacturing supplier but remains incomplete for independently validating the operating entity. The About and Contact pages provide the A1 Gravure name, Ahmedabad location, business history and direct contact details, while the site does not present a corporate registration number or sector-specific license. This is a transparency item for commercial due diligence, not evidence of a scam, particularly because the observed business model does not present regulated financial products. The available external reputation checks found no malicious or suspicious detections, and no broker-dataset match was identified; these are contextual signals rather than legal or regulatory determinations.

EVIDENCE

- The About page describes A1 Gravure's establishment in Ahmedabad and its manufacturing history.
- The Contact page publishes business contact details and a physical location; the Products and Industries pages support the stated industrial purpose.
- The domain registrar is BigRock Solutions Ltd.
- TLS uses issuer YR1 with DV validation and is valid to 2026-09-20.

What to Verify Next

Before a commercial engagement, the prospective counterparty should independently confirm the A1 Gravure legal entity, Ahmedabad premises and business contact channels using an offline or independently sourced route. Procurement should also obtain formal quotations, warranty and delivery terms, applicable return or replacement provisions, and payment arrangements that provide appropriate commercial protection. If the relationship later involves account credentials or online payment, those controls should be reviewed before submission.

EVIDENCE

- The About page supplies the claimed establishment history and manufacturing description to compare against independently obtained business records.
- The Contact page provides the details needed for an independent counterparty and premises check.
- The site's stated revenue model is product supply and custom engineering, making quotation, warranty, delivery and payment terms the relevant transaction controls.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence converging on an established, apparently legitimate corporate website and no observed scam or impersonation contradictions. The principal qualification is that the website’s connection to a independently verified real-world operator remains unconfirmed.

Infrastructure Integrity

The site resolves directly to a single hosting address, with no CDN or WAF identified and no separate edge-IP layer observed. Direct hosting is a neutral infrastructure characteristic rather than a legitimacy concern; the hosting environment is attributable to Network Solutions, LLC in the United States.

EVIDENCE

- Hosted on AS19871 (NETWORK-SOLUTIONS-HOSTING — Network Solutions, LLC, US).
- One resolved IP was observed: 162.241.6.169; edge IP count was 0 and likely origin IP count was 1.

Closing Assessment

Normal browsing and ordinary business enquiries are proportionate to the assessed posture; independent counterparty, commercial-terms and payment-protection checks should be completed before credentials or payment details are provided.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about a1gravure.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
