What aahsolutions.net served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

AAH Solutions is a local security-services website presenting security-camera installation, alarm systems, access and intercom solutions, buzzers, and locksmith services for Missouri residential and commercial customers. Its apparent business model is the sale, installation, and ongoing support of security hardware and related services through telephone and request-information contact channels.

Scam/Impersonation Risk

The site presents itself as a conventional local security-services provider and the reviewed pages showed no login form, wallet function, hidden sensitive form, or clear brand-impersonation indicator. However, this benign page presentation is outweighed by confirmed external threat contradictions: the domain is recorded as blacklisted, and multiple security-intelligence detections classify it as malicious, including detections associated with Fortinet and Sophos. The evidence does not establish an identity contradiction or a direct impersonation of another named brand, but the external reputation signal creates a material risk for credentials, payments, or other sensitive interaction. No suspicious contact-email anomaly was identified.

EVIDENCE

- The homepage describes security-camera installation, alarm systems, buzzers, intercom systems, access solutions, and locksmith services; no login form or wallet-connect activity was observed on the reviewed pages.
- External intelligence recorded 14 malicious detections, with Fortinet and Sophos among the flagged vendors.
- The domain was registered on 2020-04-12 and is approximately 6.36 years old.

Regulatory Verification Notes

The homepage supplies a business name, Missouri location reference, telephone contact, testimonials, and a request-information form, but the available evidence does not independently verify the operator behind those claims. The site does not present a license claim, licensing authority, or license number; for a security-services provider, that is a regulatory-disclosure gap requiring confirmation rather than standalone proof of misconduct. The domain is administratively registered through Squarespace Domains II LLC, while its transport security is provided through a domain-validated certificate; these technical facts do not validate the business identity or authorization to provide regulated or locally licensed services.

EVIDENCE

- The homepage identifies “AAH Solutions,” states that it provides services in Missouri, and publishes the telephone number +1 816-489-9621.
- The site’s hosting resolves through AS19871, NETWORK-SOLUTIONS-HOSTING – Network Solutions, LLC, US.
- TLS is issued by YR1 at DV validation level and is valid to 2026-10-28T06:37:41+00:00.
- The reviewed business pages contain no stated license authority or license number.

What to Verify Next

Before any appointment, purchase, deposit, or submission of personal information, the claimed business name and physical operating details should be confirmed through an independently sourced telephone listing or an offline referral. Any required Missouri or local security, alarm-installation, monitoring, or locksmith authorization should be checked directly with the relevant government or professional registry. Payment should use a method offering transaction dispute protections, and the service scope, warranty, monitoring terms, and cancellation conditions should be obtained in writing before commitment. Official support and contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides a request-information form rather than a sensitive authentication form.
- The services page content describes installation and support activities but does not identify a licensing authority or registration number.
- The site publishes testimonials and contact details, but the available evidence does not independently authenticate those representations.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. Although the page content resembles a local service-provider site and contains no obvious interactive abuse mechanism, confirmed external malicious and blacklist signals dominate the assessment, while the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to two likely origin addresses, with no detected CDN or edge-IP layer. This means mainstream protective infrastructure does not provide a meaningful mitigating layer for the observed reputation concern; the presence of functioning TLS should be treated as transport protection only, not as evidence of legitimacy.

EVIDENCE

- Infrastructure records show 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses.
- No CDN was detected.
- The resolved hosting provider is NETWORK-SOLUTIONS-HOSTING – Network Solutions, LLC, US, on AS19871.

Closing Assessment

The appropriate disposition is to avoid login, credential submission, payment, or other sensitive engagement unless the operator, applicable authorization, and transaction protections have been independently confirmed through trusted channels.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aahsolutions.net.

- The request stayed on aahsolutions.net. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by dowsumi.com, across 2 name servers. NOTED
- The registration is paid up to 2034-04-12. CLEAR
- The earliest public archive of this site is from 2021-11-25. CLEAR
- It is hosted on NETWORK-SOLUTIONS-HOSTING, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aahsolutions.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
