The page as captured

<https://aaliyaenterprise.com/>

What aaliyaenterprise.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is a minimal “Launching Soon” landing page for aaliyaenterprise.com, presenting brief marketing text, a “Contact Us” prompt, a cookie notice, and a placeholder-style presence rather than an active commercial or financial service. Its apparent purpose is to establish a web presence and collect interest before a fuller site is released.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting legal-identity contradictions were observed. The homepage contains no login form, sensitive form, transaction flow, wallet connection, or visible product solicitation, and its content is consistent with a low-risk informational placeholder. A third-party IP reputation signal records abuse reports against a shared Amazon content-delivery IP; because the attribution is to shared infrastructure rather than specifically to this website, it is a limited reputational signal and does not establish malicious activity by the site.

EVIDENCE

- The homepage is classified as a “Launching Soon” landing page and contains no forms, credential requests, transactions, or wallet-related functionality.
- The page-level analysis recorded no phishing indicators, brand-impersonation indicators, or red-flag content.
- The shared-infrastructure reputation record concerns 13 reports against IP 76.223.105.230, with a confidence score of 26 and attribution to Amazon.com, Inc. content-delivery infrastructure.

Regulatory Verification Notes

The site’s current scope is too limited to demonstrate a regulated business model. The landing page does not disclose a corporate registration, licensing authority, or license number, so legal-entity and regulatory status remain verification matters rather than findings of misconduct. The available evidence is consistent with an established, apparently legitimate website, but the real-world operator is not independently verified. The domain is registered through GoDaddy.com, LLC, and transport security is provided by a valid Domain Validation certificate issued by GoDaddy TLS Intermediate CA DV - R1v1.

EVIDENCE

- Current registration telemetry records creation on 2025-06-18 and an age of 1.17 years, with expiry on 2028-06-18; registrar: GoDaddy.com, LLC.
- Historical web records span 2013–2025, covering 13 years with 37 recorded snapshots.
- The site is served through AS16509, identified as AMAZON-02 - Amazon.com, Inc., US.
- TLS validation is DV; issuer: GoDaddy TLS Intermediate CA DV - R1v1; valid to 2027-03-02T23:53:27+00:00.

What to Verify Next

Before any future credential or payment interaction, an independent check should confirm the operator’s legal name through an applicable corporate registry and establish that any claimed service falls within the relevant licensing regime. If the site later introduces commerce, the merchant identity, return terms, and payment-protection arrangements should be checked independently, and official contact channels should be confirmed through an offline or independently sourced route.

EVIDENCE

- The homepage currently provides only a placeholder presentation and does not evidence an operational regulated or transactional service.
- No licensing authority or registration number is displayed in the available page content.
- The site has no visible login, checkout, subscription, or other sensitive-action workflow at present.

Summary Verdict

Available evidence supports a high-trust, low-risk posture for the site as currently presented. It is best characterized as an established, apparently legitimate web presence whose operational purpose and real-world operator remain only partially established. No scam or impersonation contradictions were observed.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed addresses resolving to edge infrastructure and no origin candidate identified in the analysis. This architecture reduces direct exposure of the underlying host and is a mitigating security characteristic, although it is not proof of operator legitimacy.

Closing Assessment

Normal browsing of the present informational page is proportionate; any later credential, purchase, or other consequential interaction should follow the independent identity, terms, and payment-protection checks outlined above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aaliyaenterprise.com.

- The request stayed on aaliyaenterprise.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-18. CLEAR
- The earliest public archive of this site is from 2013-08-18. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aaliyaenterprise.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
