

Is aasharahospitals.com a scam? TrustSniffer's high-risk assessment: 0/100

aasharahospitals.com

Verdict

0

OUT OF 100

CRITICAL RISK

aasharahospitals.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Chennai maternity and women's healthcare hospital site describing services (maternity, pediatrics, IVF, gynecology, laparoscopy), staff, NICU, testimonials, contact numbers and address. Primary call-to-action: book consultation / WhatsApp appointment.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://aasharahospitals.com/>

What aasharahospitals.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as Aashara Hospital, a Chennai-based maternity and women's healthcare provider offering maternity care, pediatrics, NICU and newborn services, IVF and fertility treatment, gynecology, laparoscopy, doctor information, testimonials, and appointment booking through consultation and WhatsApp calls to action. Its apparent business model is the provision of paid hospital, consultation, surgical, maternity, and fertility services.

Scam/Impersonation Risk

The site's healthcare presentation is coherent and the page-level review identified no obvious phishing forms, login mechanism, wallet functionality, hidden forms, or suspicious browser behavior. However, this benign presentation is materially outweighed by a confirmed external blacklisting and multiple malicious detections, creating a direct contradiction between the site's apparent purpose and its externally observed reputation. The homepage also uses strong promotional claims, including "Best Maternity Hospital in Chennai," "5000+ Successful Deliveries," "15+ Years Experience," "24/7 Emergency Support," and "10,000+ Happy Families,"

alongside patient testimonials; these claims are not independently substantiated within the supplied evidence and should not be treated as proof of institutional authenticity. No identity inconsistency, brand impersonation, or on-page phishing signal was identified, but the confirmed blacklist status alone warrants a security-forward posture for sensitive interactions.

EVIDENCE

- External reputation telemetry recorded 5 malicious detections and 1 suspicious detection, with the domain present on 2 external blacklist sources.
- The homepage presents maternity, IVF, fertility, pediatric, NICU, gynecological, and surgical services, but the content review recorded no login form, hidden form, password-external form, or wallet-related activity.
- Registration continuity records show creation on 2014-10-25T06:07:43Z and a domain age of 11.83 years.
- Historical archive records span 2016-08-28 to 2026-04-13, covering 11 tracked years with sparse archival coverage.

Regulatory Verification Notes

The About, Doctors, and Contact materials present the Aashara Hospital name, medical services, staff information, contact details, and a location in Chennai, but the supplied site evidence does not independently verify the legal operator. No licensing authority, registration number, or license number is claimed in the available business information, leaving a substantive regulatory-disclosure gap for a healthcare provider. Ownership and governance disclosure is also unclear, so the on-site presentation should not be treated as proof of a registered medical entity. The available third-party broker-reputation context produced no match; that result is not a healthcare licensing determination and does not offset the external threat findings.

EVIDENCE

- The available business-model record states that no license is claimed and no licensing authority or license number is provided.
- The domain is registered through OwnRegistrar, Inc.; the recorded creation date is 2014-10-25T06:07:43Z and the expiry date is 2026-10-25T06:07:43Z.
- The site is served through AS13335, identified as CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is DV-validated, issued by WE1, and valid to 2026-11-07T14:25:08+00:00.

What to Verify Next

Before any appointment deposit, fertility-treatment payment, disclosure of medical information, or reliance on clinical claims, an independent party should confirm that the hospital is registered with the relevant Indian healthcare and professional authorities and that the named doctors hold current credentials. The physical facility, telephone numbers, and appointment channels should be corroborated through an independently sourced directory or offline contact route rather than relying solely on the website. Payment instructions should be confirmed directly with the facility, and any requested medical or identity information should be limited to what is necessary after the institution has been independently authenticated.

EVIDENCE

- The homepage's primary calls to action are “Book Consultation” and “WhatsApp Now.”
- The site identifies doctors, treatments, testimonials, contact numbers, and a Chennai address, providing specific details suitable for independent corroboration.
- Behavioral inspection recorded 2 successful runs, no hidden forms, no external password forms, and no suspicious inline scripts.

Summary Verdict

The overall posture is **critical and cautionary**, with elevated risk attached to sensitive interaction. The website has a plausible healthcare presentation, but that surface-level coherence does not overcome the decisive external reputation contradiction. Identity remains unverified, and the available evidence does not support treating the site as suitable for trusted account, credential, medical-data, or payment activity.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the hosting environment, but they are infrastructure controls rather than evidence of operator legitimacy. All observed addresses were Cloudflare edge infrastructure, and the origin server was not observable in this analysis.

EVIDENCE

- Observed edge addresses include 104.21.93.16, 172.67.202.179, 2606:4700:3031::6815:5d10, and 2606:4700:3037::ac43:cab3, all associated with AS13335.
- Hosting infrastructure is identified as CLOUDFLARENET - Cloudflare, Inc., US, with 4 observed edge IPs and 0 likely origin IPs.

Closing Assessment

Prospective users should restrict activity to passive review until the provider, clinicians, facility, regulatory standing, and payment arrangements have been independently confirmed through trusted external channels. High-impact decisions should not rely on the website alone.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of aasharahospitals.com.

- The request stayed on aasharahospitals.com. It was not redirected to another domain. CLEAR
- Registration is published under OwnRegistrar, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-25. NOTED
- The earliest public archive of this site is from 2016-08-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aasharahospitals.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
