Full analysis

Overview

Abacort is a Bogotá-based commercial retail website presenting blinds, curtains, awnings, pergolas, complementary home products, and related installation and maintenance services. Its visitor-facing model is contact-driven: customers are invited to request advice or quotations through phone, WhatsApp, store visits, or video consultation.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent local-retail proposition, with detailed product categories, company history, stated values, contact and location information, and links to established social platforms. Its primary interactions are quotation and consultation requests rather than account access or sensitive-data collection; technical observation also found no login form, hidden form, wallet interaction, cloaking, or suspicious script behavior. The available evidence therefore supports an apparently legitimate, low-risk commercial website, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage describes blinds, curtains, awnings, pergolas, installation, and customer advisory services, with no fraud indicators identified.
- The contact and homepage content provide telephone, location, WhatsApp, in-store, and video-consultation contact routes.
- The site's transport encryption is a DV certificate issued by YR1, valid through 2026-10-05.
- Domain registration records show registration on 2014-09-23, with an age of 11.92 years.

Regulatory Verification Notes

The website describes Abacort as a Bogotá-based business with a long operating history and provides commercial service information, privacy information, payment information, and contact routes. No regulated financial, investment, or other licensed activity is presented, and no license or registration number is disclosed; this is a transparency item to clarify where relevant to the transaction, not evidence of deceptive conduct. The available third-party reputation context contains no matched broker warning, while the site's identity remains apparent rather than proven through independent operator verification.

EVIDENCE

- The homepage states that the business has operated for 40 years and describes its advisory, sales, installation, and maintenance model.
- The site's internal navigation includes contact, privacy-policy, and payment-information pages.
- The domain is registered through PDR Ltd. d/b/a PublicDomainRegistry.com.
- The hosting infrastructure is served from AS16276 (OVH - OVH SAS, FR), and the certificate uses DV validation with issuer YR1 and expiry 2026-10-05.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant's legal trading details and physical presence through an offline or independently sourced contact route, review the applicable payment, cancellation, warranty, and return terms, and use payment protections appropriate to the transaction. Where a regulated service or formal corporate procurement is contemplated, the relevant local registry or licensing authority should be checked against the entity details supplied during contracting.

EVIDENCE

- The homepage and contact page provide the business description and customer-contact pathways to compare with independently sourced details.
- The payment-information page is available for review before funds are transferred.
- The privacy-policy page is available for review of the site's stated data-handling terms.
- Social links to Instagram and Facebook provide additional channels for consistency checking.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were identified, although the

connection between the website and a verified real-world operator is not independently established.

Infrastructure Integrity

The site benefits from CDN/WAF protection, which provides a mitigating layer against routine exposure and abuse. Observed infrastructure includes OVH hosting, one identified edge address, and additional potential origin candidates; this reflects a segmented hosting arrangement rather than a legitimacy determination.

Closing Assessment

Normal browsing and ordinary commercial engagement are proportionate, subject to routine independent merchant-identity, transaction-term, and payment-protection checks before credentials or funds are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about abacort.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
