## Full analysis

### Overview

[abbacharts.com](https://abbacharts.com/) is an informational music-history website presenting national chart listings, chart runs, sales certifications, commentary, and related data concerning ABBA and its four members. Its apparent purpose is archival and educational rather than commercial, with visitor interaction limited to browsing country, artist, and chart information.

### Scam/Impersonation Risk

No scam, phishing, impersonation, or identity-contradiction signals were observed. The homepage presents a coherent ABBA chart-information purpose, identifies the artists covered, explains how chart data is accessed, and displays update and maintainer information. Available reputation checks found no malicious or suspicious detections, while the absence of login forms, sensitive forms, wallet activity, external submissions, and cloaking is consistent with a low-risk informational site. The real-world operator remains independently unverified, so the apparent legitimacy of the site should not be treated as proof of a particular person or legal entity.

#### EVIDENCE

- The homepage describes ABBA and its members, national chart listings, chart runs, certifications, sales figures, and commentary.
- The homepage contains no login or sensitive-data form; observed behavior recorded 0 external XHR requests, 0 wallet-connect runs, and 0 hidden forms.
- Available external checks recorded 0 malicious detections, 0 suspicious detections, and no phishing or confirmed threat-listing contradiction.
- Domain registration: 2021-06-20 (~5.17 years old); 37 archive snapshots spanning 2014–2026 (13 years tracked).

#### Regulatory Verification Notes

The site appears informational and does not present financial products, regulated services, or obvious monetization requiring a financial-services license. Its supplied content does not establish a legal operating entity or a license number, which is a limited disclosure gap rather than evidence of deception in this context. Registration through TUCOWS.COM, CO., valid transport encryption, and stable hosting provide supporting infrastructure and continuity signals, while the available broker-related third-party context contains no match.

#### EVIDENCE

- The homepage identifies the subject matter as ABBA chart history and includes update and maintainer metadata, but does not state a legal entity or regulated license.
- Registration registrar: TUCOWS.COM, CO.
- Hosted on AS40092 (ONIAAS - HostPapa, US).
- TLS certificate issued by YR2 (DV), valid to 2026-09-23T23:04:23+00:00.

#### What to Verify Next

Before any future credential or payment interaction is introduced, the site's maintainer identity should be confirmed through an independent source, and any applicable terms, rights statements, or payment-protection arrangements should be reviewed directly. For present browsing use, the principal verification task is to distinguish the site's archival content from any later third-party service or transaction presented through it.

#### EVIDENCE

- The homepage states that the site was last updated on 25 August 2024.
- The homepage provides navigation instructions for selecting country names and flag icons to view chart information.
- The observed page contains no purchase, account, password, wallet, or payment workflow.
- The page is categorized as informational/music charts, with no obvious monetization or financial-transaction model.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. Its coherent informational purpose, sustained provenance, clean available reputation, and stable

technical presentation converge without observed scam or impersonation contradictions. The operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by ONIAAS - HostPapa in the United States, with no CDN or WAF detected and one likely origin address. This is ordinary hosting rather than a protective edge architecture; the valid DV certificate and identified hosting environment are mitigating technical signals, not independent proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate; before any future credential or payment interaction, conduct standard independent checks of the responsible operator, applicable terms, and available payment protections.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about [abbacharts.com](https://abbacharts.com) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
